

Release Notes for 7.0.2002

Feature	Type	Comments	Settings	Required Changes
AR	Change	The "New" button in AR Multiple Payments screen will now use the posted balance as the default payment amount if the customer has never received a statement.		
Cash Control	Fix	Bank deposit files now properly subtract beginning cash total from deposit total.		
Credit Cards	Change	Batch CC operation now disables PIN with Timeout check (as is customary for long-running modal requests).		
Credit Cards	Fix	Fixed, also now works when "File > Exit" is selected or the window is closed with the red "X".		
Email	Fix	Email receipts were showing cash credit payments as "CCred" for the tender type.		
Email	Fix	Emailed statements to multiple email addresses will now update the "sent" date properly.		
Email	Addition to Existing Feature	<i>As a user, I would like to email my customers their locker location</i> @RACKLOCATION and @LOCKERINVOICES tokens have been added to email functionality. Both are replaced by the invoice's rack location.		
General	Fix	"Force Clock-In" user setting will no longer require a clerk to clock in if they try to exit SPOT.		
General	New	<i>Sprint 12 - Revision Bugs and</i>	New selection for	

	Feature	Tasks Added a Security Mode called "PIN - Per Operation w/Timeout", that combines the PIN timeout with the per operation modes.	"Company Settings >Security Settings > Security Mode", called "PIN - Per Operation w/Timeout"	
General	Fix	The A/R Multiple Payments screen was not allowing the payment amount to be edited.		
General	Fix	Email receipts for credit card payments processed through manual terminals were showing "Credi" as the payment type.		
Home Page	Fix	License agreement was not allowing customers in non-US localities to accept the agreement if the day was greater than 12 (due to a SQL Server date format issue).		
Home Page	Fix	Fixed "Kiosk Declines" alert/search to only show orders that have been specifically sold out through a Kiosk.		
Licensing	Addition to Existing Feature	Added link to the license agreement window to pull up the agreement via the SPOT web site. Also, updated the agreement text to the 1 Oct 2013 version.		
Markin	Fix	Resolved issue where after a split is performed in detail that the current order in progress could not be viewed in Order View until after it was saved.		
Markin	Addition to Existing Feature	As a SPOT user, I would like to update brands if the HSL is missing the required information During markin, SPOT can now check for the presence of a missing modifier and prompt the user to	Store->HSL Settings->Check Required Modifiers on HSL Scan	

		add it to the HSL definition.		
Markin	Addition to Existing Feature	<p><i>As a SPOT user, I would like important brands to pop-up to flag their importance.</i></p> <p>The ability for special instructions to be displayed when incremental brands are selected at markin has been added.</p>	<p>New "Special Instructions" field in Company Settings > Mark-in Settings > Modifiers > (Brands) > Incremental List Setup screen.</p> <p>Company Settings > Mark-in Settings > Incremental Modifier Upcharges > (Upcharge) > "Special Instructions"</p>	
Markin	Change	<p><i>As a SPOT user, I would like upcharge to be labeled as 'Special Charge' in markin screens</i></p> <p>Markin screens, Item Detail screen, and HSL Definition screen now use the term "special charge" instead of "upcharge."</p>		
Pricing	Fix	Upcharge amounts configured to four decimal places were not saved with any decimal places, resulting in overcharging.		
Reports	Fix	Fixed run-time error during adding an excel presentation to a report.		
Reports	Addition to Existing Feature	Reports Gallery > Route > "RouteTrac - Route Report" -The end of route report from RouteTrac Mobile. Displays session information for the selected route for sessions beginning between selected date ranges.		

Reports	Change	<p>Reports Gallery > A/R > ACH Customers - No longer groups by store. Ordered by name.</p> <p>Reports Gallery > A/R > ACH Payments - Groups by Payment Date then ordered by name.</p>		
Reports	Change	<p>Reports Gallery > Management > Daily Report - Updated Daily Report to base top customer sales on where the invoice activity occurred rather than the customers store.</p>		
Reports	Change	<p>Reports Gallery > Management > Employees - Changed the report to display the employee ID instead of SSN.</p>		
Routes	Fix	<p>Scheduled Route Setup button was becoming permanently disabled if used once in Customer View.</p>		
Routes	Addition to Existing Feature	<p>Add 'Late' message for dormant customer (Driver Message)</p> <p>Route Manifest - Driver Message - Added 'Late' message for dormant customer, between 14 & 28 days. Also added the 'last route visit' date to the driver messages.</p>		
Routes	Addition to Existing Feature	<p>On the fly mapping in SPOT on the RouteTrac screen</p> <p>Added to the RouteTrac Manager view the ability to map any route event (for those systems with GPS enabled), and compare it to the stop's address.</p>		
Security	Change	<p>Timed logout now includes a message to the user indicating that the message has timed out.</p>
