

# Release Notes for Version 7.0.2642

Application	Feature	Type	Comments	Settings
SPOT	AR	Addition to Existing Feature	<p><b><i>As a SPOT user, I would like the ACH feature to create CSV files instead of XLS</i></b></p> <p>"Company Settings &gt; A/R Settings &gt; ACH File Type". This can be set to "(none)", "Excel (*.xls)" (the default), or "Comma-separated (*.csv)" to allow users to create comma-delimited export ACH files instead of Excel export files.</p>	<p>Company Settings &gt; A/R Settings &gt; ACH File Type</p> <p>Can be set to "(none)", "Excel (*.xls)" (the default), or "Comma-separated (*.csv)"</p>
SPOT	Assisted Assembly	New Feature	<p><b><i>Setting to warn the user that this piece has already been on the assembly bay today. They are getting pieces missed in assembly and bagged as partial orders then finding the stragglers later in the day.</i></b></p> <p>Added a warning to Assisted Assembly (with a threshold setting) to let the user know if an item has been scanned within x days.</p>	<p>Assembly Profile, "Warn of Item Rescan (Day Threshold)"</p>
SPOT	Batch Markin	Fix	<p>Do not allow HSL from a hotel customer in a different store to be scanned at batch markin. Detail markin already prevents this. Loophole now closed.</p>	
SPOT	Configuration	Change	<p><b><i>As a SPOT user, I would like to hide 'Cash Credit' and 'A/R Adjustment' reasons</i></b></p> <p>In the payout screen, remove any item explicitly marked as "Hidden" in settings (e.g., A/R Adjustment Reasons, Cash Credit Reasons).</p>	<p>Company-&gt;Markin-&gt;A/R Adjustment Reasons Company-&gt;Markin-&gt;Cash Credit Reasons</p>
SPOT	Conveyor	New Feature	<p><b><i>As a SPOT user, I would like to specify an on-the-fly split count to my conveyor to</i></b></p>	

			<p><b>offload orders immediately</b>  Added to the "Assembly Orders" tab of the conveyor management view a button, "Select Orders by Item Count", which will prompt the user for an "On Assembly" item count threshold. The view will then select and highlight all orders meeting or exceeding this threshold. From there, the orders may be split or removed from the conveyor.</p>	
SPOT	Coupons	Change	<p><b>As a SPOT user, I would like to have an option to email instead of reprint award coupons as needed.</b>  If a reprint of a customer reward coupon is requested and the store is configured to always e-mail rewards, SPOT will now prompt if the customer wants an e-mailed coupon or a printed coupon regardless of the setting.</p>	
SPOT	Coupons	Change	<p><b>As a SPOT user, I would like redeemable rewards to allow removal, otherwise sort the list by newest first.</b>  On Customer View-&gt;Reprint Awards, sort the list in descending chronological order.</p>	
SPOT	Credit Cards	Fix	<p>Fixed issue in Reverse Payments - when the card was swiped, the track information was being stripped out before the credit payment was submitted. This caused the encrypted swipes to fail.</p>	
SPOT	Customer Connect	Fix	<p>The memory leak that occurred after processing Signup or Change Account web requests has been fixed.</p>	
SPOT	Email	Fix	<p>Fixed an issue that prevented Email Address Manager from working with Gmail or</p>	

			Google Apps.	
SPOT	Email	Fix	Batch email screen would crash if Select Stores/Routes option was used but nothing was selected.	
SPOT	Email	Addition to Existing Feature	<b><i>As a SPOT user, I would like the batch email message body field to allow html for unsubscribe reasons.</i></b> In SPOT, the unsubscribe	
SPOT	Email	Change	Emails will now always be sent as an HTML format.	
SPOT	General	Fix	Email addresses that had been marked as invalid were still marked as invalid after replacing them with a new email address.	
SPOT	General	Change	<b><i>As a SPOT administrator, I require all passwords in config files to be encrypted</i></b> Conveyor Client/Host will now encrypt an unencrypted connection string in the .config file.	
SPOT	Hotels	Fix	Hotel orders split in the Quick screen were losing the hotel discount.	
SPOT	Markin	Fix	Concurrency error when two sessions logged into the same workstation both accessed a Detail order on hold, resulting in the possibility of duplicate active HSLs which causes problems with assembly. SPOT now checks just prior to detailing whether the order was already resumed on a different workstation.	
SPOT	Markin	Fix	Eliminated concurrency block when Workstation 1 had an unanswered item disclaimer prompt at the same time Workstation 2 was attempting to view the new invoice. Resolution: SPOT now prompts	

			prior to saving the invoice.	
SPOT	Pickup	Addition to Existing Feature	<p><b><i>As a SPOT user, I would like cash transactions to be rounded to the nearest whole number.</i></b></p> <p>An option of "1.00" has been added to the "Store Settings &gt; Cashier Settings &gt; Round Cash Transactions" setting. This will enable rounding to the nearest 1.00 for cash transactions.</p>	Store Settings > Cashier Settings > Round Cash Transactions
SPOT	Pickup	Fix	It was possible to crash SPOT if a credit card on file was added to the customer profile at the Order Pickup screen and the "Non-Cash Payment Adjustment" setting was in use.	
SPOT	Printing	Addition to Existing Feature	<p><b><i>As a SPOT user, I would like a 'processing cost total' invoice node for my template</i></b></p> <p>A "TotalProcessingCost" node has been added to the Invoice document template type.</p>	
SPOT	Production	Fix	Menu > Production Tracking > User Activity - Fixed an error that occurs when the date range is cancelled.	
SPOT	Reports	Addition to Existing Feature	Menu > Production Tracking > User Activity - Added an hourglass while data is being loaded.	
SPOT	Reports	Change	The 'Customer Invoice Detail' report description needed to be reworded to be more specific.	
SPOT	Reports	Fix	Item price changes were causing an error in the "Daily Report".	
SPOT	Reports	Change	Reports Gallery > Customer > Top X by Sales reports - Improved the performance	

			of the reports.	
SPOT	Routes	Fix	Some route customers were receiving email receipts that referenced invoice numbers that did not belong to them.	
SPOT	Security	Fix	Fixed issue with preventing the re-use of user passwords.	
SPOT	Security	Fix	Users without the right to enter the Search screen could still get there by double-clicking on the Production Commitment grid.	
Dashboard	General	Fix	On a popup dialog, if the session has expired, it will ask the user to login within the popup dialog and then they will continue on where they left off.	
Dashboard	General	Change	User will now be directed to login if their session expires.	
Dashboard	General	Change	The account name can now be overridden with the brand name.	
OTS	General	Fix	Route reminders will now include customers who have never had a visit before.	
OTS	General	Fix	Fixed an issue with route reminders not going out for on demand customers who do not have a pickup day specified.
