Release Notes for Version 7.0.2941

App	Feature	Type	Comments	Settings / Required Changes
SPOT	AR	Fix	If a statement containing a special charge was re-run with CCOF/ACH payments enabled in the Statement Wizard, the payment generated included the special charge twice.	
SPOT	Assisted Assembly	Change	**As a SPOT user, I would like assisted assembly to give voice prompts and comments to headphones** Added "Voice Response" to the assisted assembly process. This will replace the different tones and chimes that represent different actions on the screen with voice prompts of where the garments are to be placed, and what their status is.	Store Settings > Process Step Settings > Assembly Profiles > Profile: Voice Response - Enable Voice Response - Voice
SPOT	Assisted Assembly	Fix	In the Assisted Assembly screen, the top of the location field was cut off if the screen was resized to a large size.	
SPOT	Configuration	Fix	Reward coupons were automatically printing for customers without an email address if SPOT was configured to always email reward coupons.	
SPOT	Conveyor	Change	**As a SPOT conveyor user, I would like the offload room option, '' to be at the top of the list, instead of the bottom.** Restoration Conveyor Offload - Moved "" option to top of the list, added confirmation warning to the operation.	
SPOT	Conveyor	Fix	Fixed issue with the MP label for hotel orders, where some orders printed with a zero value.	
SPOT	Credit Cards	Change	**As a SPOT user, I would like an option to prevent any and all automated disabling of CCOF** Fixed issue with CCOF entries - when the user was prompted to update an expired CCOF entry, the card would automatically disable if the user selected to NOT update the entry. Also assured that tokenized CCOF entries would not disable on an expired entry.	New setting to enable - "Credit Card Profile > Disable Declined CCOF > Disable when Expired". Defaults to unchecked.
SPOT	CRM	Fix	**As a SPOT user, I would like HTML entries in CRM to show as customer has viewed it.** The CRM preview window in Customer View now properly displays HTML-formatted emails.	
SPOT	Email	Change	**As a SPOT user, I would like to email process interceptor based email notifications using any workflow step context.** Added support for the Email Process Interceptor for a "Scan" context, which can be associated with any processing step. This behaves much like the "Detail" context, but will a) use the (new) Customer Reminder settings for "Counter Order Scanned" & "Route Order Scanned", and b) use the email token @SCANNEDINVOICES to embed the invoice within the email message.	

			Added similar support to the SMS interceptor, but without the ability to embed the invoice image.	
SPOT	General	Fix	The "Discard" button on the Offline Pickups screen was not working.	
SPOT	General	Fix	Configuration tracking screen had a trapped conversion error for localities with dd/mm/yy date formats.	
SPOT	General	Fix	Fixed issue with UK CC "Customer Present" transactions.	
SPOT	General	Fix	Fixed issue with the conveyor retrieving invoice data when duplicate invoices exist in a store not associated with the conveyor.	
SPOT	General	Addition to Existing Feature	***As a new SPOT user in Qatar, I would like Qatar added as a locality in SPOT.*** Qatar has been added as a locality in SPOT.	
SPOT	HSL	Addition to Existing Feature	***As an HSL Association user, I would like to toggle between showing all items and only unassociated items*** Added "Show All" / "Show Unassociated" button to HSL Association screen. This allows the user to associate HSLs for orders with more than 24 items. The clerk can also see quickly how many items are remaining to be scanned.	
SPOT	Inventory	Fix	Attempting to close the Inventory Scan screen would ask the user twice if they wanted to print the exceptions report.	
SPOT	Markin	Fix	Auto-select quick department was not working in touch screen-extended if the department in question had an ampersand (&) symbol.	
SPOT	Markin	Fix	When auto-pay is enabled at detail and a multi-order visit is detailed with an item-specific coupon, the CC amount charged was sometimes different from the post-coupon-evaluation totals of all of the orders.	
SPOT	Markin	Fix	Adjustments added when redetailing a hotel order were not saving with the invoice.	
SPOT	Order View	Fix	Invoices containing only alter-only items were still displaying the invoice tax rate in the Visual Invoice, instead of the alteration tax rate.	
SPOT	Order View	Change	***As a Conveyor user, I would like a clear indication that the order was created as a result of dynamic split, to avoid confusing the order as new mark-in.*** Added 'SPLIT' status to the invoice search view, for invoices in 'Detailed' status that were also split.	
SPOT	Order View	Change	***As a Conveyor user, I would like to select the user that the***	

			SPLIT monitor uses to log in and split on behalf of. In an effort to preserve the user that should receive credit for an order, all auto-split orders (conveyor, assembly, lot manager) will retain the originating user identifier.	
SPOT	Pickup	Addition to Existing Feature	*As a SPOT user, I would like my zero-amount-paid hotel pickups to show on my hotel statements, like other hotel pickups do.* The Order Pickup screen will now create A/R postings for zero-price hotel orders, like the hotel Post Orders screen does.	
SPOT	Reports	Fix	Trying to add a SPOTQuery presentation before selecting a data source type caused SPOT to crash.	
SPOT	Routes	Change	*MFM – Prompt and add Starting and ending miles at the time of a route post and incorporate the numbers in to the route report card to calculate miles, revenue per mile etc* Added option to prompt the user for vehicle starting and ending miles when posting route orders in SPOT.	Store Settings > Route Settings > Enter Mileage at Post Route Orders (No / Optional / Optional* / Required) The 'Optional*' selection will prompt the user if mileage not already entered.
SPOT	Routes	Addition to Existing Feature	*As a SPOT user, I would like the on-demand scheduler to have cutoff time enhancements* Added a cutoff time for same day pickup on the OnDemand Scheduler. When set, it will not allow a pickup to be scheduled for the same day if it is passed the cutoff time. On-Demand Time Ranges can be used to set the default selected day.	Store Settings> Route Settings > OnDemand Scheduler Same Day Cutoff
SPOT	Search	Fix	Using the 'Show Archived' button in the Invoice Search screen was causing an "Invalid search" error.	
SPOT	Search	Addition to Existing Feature	*As a SPOT user, I would like the garment search to inform me when I have reached the search result limit.* If the result set in the Garment Search screen is too large, a warning message is now displayed, informing the user that all matches may not have been displayed and suggesting that the search criteria be narrowed.	
SPOT	Security	Change	Settings Support Opt-in will now inform the user that no consent is required if Company Settings->Security Settings->Security Mode is set to "No Security."	
SPOT	Setup	Change	Customer Rewards / Frequent Buyer setup - changed so that a) if they check off to use pieces, the grid recaptions so that it doesn't indicate currency, and b) provided a specific example, such as "Receives 2 points per piece".	
SPOT	Setup	Fix	Billing group setup was cutting off the Discount Percentage field.	
SPOT	Setup	Fix	Changelog tracking would not generate if the total number of changes exceeded 32767.	

SPOT	Setup	Change	Company Settings->Credit Card Settings->Credit Card Profiles->Processor Type & Merchant ID now warn the user twice if modified. Changes are tracked by user in the change tracking log.	Company Settings->Credit Card Settings->Credit Card Profiles->Processor Type Company Settings->Credit Card Settings->Credit Card Profiles->Terminal - Merchant ID
SPOT	Tags	Fix	Fixed issue with tag printing, where tags belonging to invoices with multiple departments, and items with multiple pieces, would not print all tags.	
SPOT	Tags	Fix	Tags may now be selected when the Invoice View is preventing changes. This will still not allow one to add/remove tags, but the user may now selectively reprint tags.	
SPOT	Timeclock	Change	Added dialog to pay period setup, showing the user the number of pay periods that will be added and prompting to confirm.	
SPOT	General	Change	All collections under Company Settings->ProductionTrac settings can be manually ordered.	
SPOT	General	Change	Company Settings->Operations Settings->Wholesalers can now be manually ordered.	
OTS	General	Addition to Existing Feature	**OTS - Being able to search or sort the batches that were processed (by Name)** All Batches screen now has display filters.	
OTS	General	Change	**As an OTS User, I would like the One and Done threshold label to accurately represent what it does.** Reworded 'One and Done' threshold visit counter label for better accuracy	
OTS	General	Addition to Existing Feature	**OTS - 90-120 option for overdue inventory.** Added 3 new date choices for Overdue Inventory: 90-119 days, 120 days, 120+ days. Added 3 new tokens (orders, amounts, piece count) for each date choice: @Late120Orders @Late120Count @Late120Amount @Late120OrdersStrict @Late120CountStrict @Late120AmountStrict @Late120pOrders @Late120pCount @Late120pAmount	

OTS	General	New Feature	***OTS – Lost Tuna option using the same setting we have in spot.*** New batch type of "Lost Tuna". This includes all customers who have sales during the specified date range and have not been active during the second date range with a minimum sales threshold.	
OTS	General	Fix	Resolved an issue with the Customer Profiling that was not correctly retrieving the top customers by sales amount when used with the Top X or Top X Percent by Sales setting.	
OTS	General	Addition to Existing Feature	***As an OTS user, I would like to be able to minimize settings to allow for more template editing space.*** Batch setup can now collapse settings sections to allow for a larger viewing area of the template editor.
