Release Notes for Version 7.0.3045

App	Feature	Type	Comments	Settings
SPOT	AR	Addition to Existing Feature	*As a SPOT user, I would like the item info on statements to include alterations.* Item alterations and prices have been added to the item information on statements (if SPOT is configured to show item information).	
SPOT	AR	Fix	The totals line of hotel statements with late fees or finance charges was not adding up.	
SPOT	AR	Fix	The Statement Wizard was crashing during CCOF payment generation for any billing groups with a special charge.	
SPOT	AR	Addition to Existing Feature	*As a SPOT user, I would like single A/R payments to ignore the 'Send Payment Receipts For' setting* "Yes - Batch Only" has been added as an option for the "Store Settings > A/R Settings > Send E-Mail Payment Receipt" setting. This will cause that only batch payments will send email receipts.	Store Settings > A/R Settings > Send E-Mail Payment Receipt
SPOT	Assisted Assembly	Fix	Fixed Assisted Assembly voice prompts to omit '*' characters from speech.	
SPOT	Cash Control	Fix	Refunds were not being issued properly for overpaid invoices if "Round All Transactions" cashier setting was enabled.	
SPOT	Configuration	Fix	Fixed issue where certain settings marked as "prompt to confirm" were not saving properly.	
SPOT	Configuration	Addition to Existing Feature	*Configuration Tracking - Track when invoice and other printed templates have changed* Company Settings->Report/Printing Settings->Templates now include a revision number which is visible in Configuration Tracking.	
SPOT	Conveyor	Change	*As a SPOT Administrator, I would like improvements to the print cache server and print caching batch process* Print Cache Server now fully closes when the window closes (preventing background phantom processing) Conveyor resends/invoice reposts will not send a duplicate pending post. Duplication is determined by the order's unique saved version (persistencets) along with a check of the invoice printing template (should printing be enabled).	
SPOT	Credit Cards	Change	*As a SPOT user, I would like to verify a CCOF with an encrypted swipe immediately, and save the*	

			token if it's available. Updated the "Update CC Token" functionality so that, if there is a new CC entry, the button will "Retrieve CC Token". If the CCOF entry is already tokenized, the button will caption as "Update CC Token", and the functionality will work as usual. Also, if tokens are enabled, and the "Verify CCOF" button is selected, the token will be fetched and the system will respond with a successful verification.	
SPOT	Customer Connect	Change	Added message prompt when processing a pickup request that is past the pickup date.	
SPOT	Customer Connect	Fix	If a customer was signed up in CustomerConnect with the same phone number as an existing customer that had a refused email address, the new email address would be lost when merging the two customers in SPOT.	
SPOT	Customer Connect	Fix	Resolved an error when processing signup or change account Web Requests.	
SPOT	Customer View	Addition to Existing Feature	*As a SPOT user, I would like to lock customer ratings so that the rating never changes* The ability to "lock" customer ratings has been added to SPOT, so that selected customer ratings will not be overwritten when the ratings process is run.	
SPOT	Email	Addition to Existing Feature	*As a SPOT user, I would like the 'Print or Email Visit Info' option for prompt to include 'Both' and 'None'* "Both" and "Neither" have been added as options if clerk is prompted to print or email visit ticket.	
SPOT	Email	Addition to Existing Feature	SPOT now allows saving the current email in progress as a draft to be worked on at a later time. This includes both ad-hoc (single customer) and batch emails.	
SPOT	Email	Fix	If a customer had the "Batch Email" notification type set to something other than "Email1", and an on-demand email was sent from Customer View, the email address selection screen was still defaulting to "Email1".	
SPOT	Email	Fix	Canceling out of the multiple email address selection screen while emailing from Customer View was sending the email anyway, to the first email address on the list.	
SPOT	General	Fix	Maximizing SPOT on the reports tab caused "Crystal Report" text to appear in a strange location.	

SPOT	General	Fix	Pay periods were not saving properly in some cases. Introduced in 2941 build.	
SPOT	General	Change	Collection items can no longer be saved with blank/space-only names. This was problematic in certain cases.	
SPOT	Home Page	Addition to Existing Feature	*As a SPOT user, I would like a graph that will show 'Visits by Weekday'* A "Visits by Weekday" graph has been added to the Graphs tab of the Home Page.	
SPOT	Home Page	Addition to Existing Feature	*As a SPOT user, I would like to view labor category information from the summary tab.* A button has been added to view labor category detail of the Hours Worked cell in the Summary tab of the SPOT Home Page (if labor categories are in use).	
SPOT	Messaging	Addition to Existing Feature	SPOT messaging now allows saving a draft of a message in progress. This makes it possible for the clerk to use the SPOT workstation for another purpose and to then resume editing the draft message.	
SPOT	Printing	Fix	Modification to SPOT invoice printing which allows non-standard characters to be printed even if UnicodePrinting is not enabled by default.	
SPOT	Reports	Fix	The Daily Report would error out if a price change event involved an item whose description included the character sequence ' to '.	
SPOT	Reports	Change	Made performance improvements to Time Clock Users report.	
SPOT	Reports	Addition to Existing Feature	*As a SPOT user, I would like to have a report (not just activity log) that shows any updated email addresses with assorted client information* "Email Address Updates" report added to Customer folder of Reports Gallery.	
SPOT	Reports	Addition to Existing Feature	*As a SPOT user, I would like increase the number of visits to 16 on the report* Reports Gallery > Customer > Customer Initial Activity - Extended - New report based off of Customer Initial Activity that exports direct to Excel and shows up to 16 visits.	
SPOT	Reports	Change	*As a SPOT user, I would like 'Customer Initial Activity Report' to use the 'FirstVisitDateTime' instead of the 'SignupDate'.* Reports Gallery > Customer > Customer Initial Activity (all versions) - Added prompt to base the date range on the sign up date or the first visit date.	

			Added referral detail to the report. Added direct to Excel presentations.	
SPOT	Reports	Addition to Existing Feature	*As a SPOT user, I would like a report that will show the top brands* Reports Gallery > Production > Brand Usage - New report that will display all brands that have been used at least once and will sort by number of times used.	
SPOT	Reports	Addition to Existing Feature	*As a SPOT user, I would like the dunning letter to use the billing address instead of primary if present.* Added new WordMerge tokens: BillingAddress1 BillingAddress2 BillingCity BillingState BillingPostalCode New OTS tokens: @BILLINGADDRESS1 @BILLINGADDRESS2 @BILLINGCITY @BILLINGSTATE @BILLINGPOSTALCODE These will use the billing address on the customer record when possible and use primary address if a billing address does not exist. Updated Dunning letters to use these new tokens instead of the standard primary address only tokens.	
SPOT	Reports	Change	*As a SPOT User, I would like RouteTrac Summary to display starting and ending miles.* Reports Gallery > Route > RouteTrac Summary - Added start and ending miles. Added $/Mile column.	
SPOT	Restoration	Change	*As a SPOT restoration user, I would like the restoration assembly feature to show moved items as a comment in invoice history.* Assisted Assembly - Restoration Mode - Added invoice comment to original order indicating which invoices each item was moved to.	
SPOT	Restoration	New Feature	*As a SPOT restoration user, I would like a way to mass close all orders for a single job.* A new screen has been added to batch close restoration orders. Available from "Order	

			Management" in F3 Menu.	
SPOT	Routes	Fix	Fixed issue with the Route Scheduler, wherein a "Customer Memo" added from that view did not populate the "Created Date" and "Created By" fields.	
SPOT	Setup	Addition to Existing Feature	*As a SPOT user, I would like SPOT to remember my last window location (non-hosted only)* Non-hosted only - SPOT will remember the last window size/location/monitor and will restore SPOT to that location. NOTE - the remembered location will not be used if the user's monitor configuration (number and order of monitors) changes.	
SPOT	Setup	Addition to Existing Feature	*As a SPOT administrator, I would like metastore change logs to be generated during server setup* SPOT now generates change logs during server setup to provide visibility to new/changed settings after an update.	
SPOT	SMS	Change	*As a SPOT SMS user, I would like the 'SMS - Replies' alert to be sortable in the list of alerts - PHASE 1* In Company Settings->Operations Settings->Alerts, system-defined alerts will still be updated with each release but their positions in the overall alert list will not be modified. This allows custom alerts to be placed anywhere within the list of alerts. This fixes the issue where custom alerts could not be listed on the first page of alerts. The only exception is if a system-defined alert is removed, at which point it will be re-added in its original position. Its position can be changed after it has been added back, though.	
SPOT	Splitting	Fix	Items split from prepaid orders with coupons would sometimes cause an erroneous "prepaid split order" adjustment to be created in the newly created order.	
SPOT	Tags	Fix	Fixed issue with tags printing during "Detail", and failing after multi-quantity item is selected.	
Dashboard	General	Fix	Fixed an issue that caused mapping addresses and coordinates to fail with the Map widget.	
Dashboard	General	Fix	Improved accuracy and performance of Campaign Details popup.	

OTS	General	Addition to Existing Feature	*As an OTS user, I need enhancements to the email component.* Replaced email component to support embedded images. Added support for SSL based authentication with an SMTP server.	
OTS	General	Addition to Existing Feature	*As an OTS user, I would like to be able to pass an username in to the URL.* Added UserID as a parameter in the URL. Sample URL: https://dashboard.mydrycleaner.com/Gateway/Login.aspx?AccountID=TestAccount&UserID=UserTest	
OTS	General	Fix	Fixed a run-time error that was occurring when deleting a batch from "All Batches" view.	
OTS	General	Fix	Fixed an error when changing pages on All Batches screen.
