

Release Notes for Version 7.0.4823

App	Feature	Type	Comments	Settings/Required Changes
SPOT	Activity Log	Addition to Existing Feature	<p>As a SPOT user, I would like web requests for pickups allow to the customer view to be selectable.</p> <p>The Customer View button will now allow access to the customer record in the On Demand screen when invoked from a pickup-type Web Request.</p>	
SPOT	Activity Log	Change	<p>As a SPOT user, I would like the Activity Log to scale with full screen and scroll by click-drag</p> <p>The Tools->Activity Log window is now resizable. If space permits, the Activity Log results columns will automatically scale to fit the information presented.</p> <p>Also, modified the scroll bar to allow for paging. NOTE - the tracking rectangle is no longer available.</p>	
SPOT	AR	Fix	SPOT was crashing if the user attempted to email hotel statements that were under the statement threshold criteria.	
SPOT	AR	Change	<p>As a SPOT user, I would like safeguards when sending an A/R receipt via email.</p> <p>1. Fixed a problem where the approved message file must be present even if configured to only send emails on declined payments.</p> <p>2. Fixed a problem where AR Payment Decline emails were not checked for compliance with the Email Without Unsubscribe Link setting.</p> <p>3. Added default subject lines rather than sending empty subjects if not configured.</p>	
SPOT	Assisted Assembly	Fix	Fixed a problem where Assisted Assembly Profile Voice Selection would crash if the last selected voice is not installed.	
SPOT	Assisted Assembly	Addition to Existing Feature	<p>As a SPOT user, I would like to clear all assisted assembly assignments with a single button.</p> <p>Assisted Assembly - Added a 'Reset' option, that will allow the user to reset the view, cleaning all entries currently in assembly.</p>	
SPOT	Cash Control	Fix	Using "Single Drawer" cash drawer association, It was possible to use the Prepay button in the markin screens even if the cash drawer had been checked out on another workstation during the markin session.	
SPOT	Configuration	Fix	<p>As a SPOT user, I would like the currency symbols to be consistent in SPOT, regardless of the environment</p> <p>The correct locality-based currency symbol will now display in Layout Editor reports and the coupon setup and merchandise setup screens.</p>	
SPOT	Coupons	Change	Coupons that evaluate by piece now pro-rate amounts by piece and discount accordingly (Type 3/4/5/6 coupons only).	
SPOT	Coupons	New	As a SPOT user, I would like to apply the best available	Company Settings->Customer Rewards Settings-

		Feature	<p>coupon from range of choices. For Customer Rewards, a new option allows you to specify a set of coupons and to automatically apply the best available coupon from the items in the mark-in session.</p>	<p>>Customer Rewards Profiles->(Profile)->Use Best Available Coupons</p> <p>Company Settings->Customer Rewards Settings->Customer Rewards Profiles->(Profile)->Best Available Coupons list.</p>
SPOT	Coupons	Addition to Existing Feature	<p>As a SPOT users, I would like an option to auto-hide and/or auto-delete based on a configured date. Order View->Coupons will no longer show expired coupons (as defined in Company Settings->Markin Settings->Coupons->(Coupon Definition)->'Valid Dates and Times'. If no entries are added, the coupon is treated as allowable at all times.</p>	
SPOT	Coupons	Change	For clarity, the type 6 coupon definition caption now shows "Discount all Most Least expensive items remaining after counting qualifying items."	
SPOT	Credit Cards	Fix	Fixed - TSYS card payments that were attempted to be voided from a workstation that didn't have a terminal installed would not correctly issue a cash credit to the customer (failed CC saved as a CC payment anyway).	
SPOT	Customer View	Fix	SPOT would crash if the user attempted to view an archived hotel statement.	
SPOT	Customer View	Change	<p>Coupon History is missing from customer view page Updated the Customer Promotions tab to show a history of ALL coupon usage for the customer. Included "Details" (also avail by double-clicking a row) which will show the visit history where the coupon was used, and also a "Print" to print the coupon usage report. This view will show all coupons for the previous 12 months.</p>	
SPOT	Email	New Feature	<p>Create a new separate email template for quicks. Emails can now be sent from SPOT for counter orders that are in Quick status. This includes the Email Notifier process interceptor and Order Status Notifications.</p>	<p>Store Settings > Email Settings > Event - Counter Quick > Return Address Store Settings > Email Settings > Event - Counter Quick > Subject Store Settings > Email Settings > Event - Counter Quick > Message File (HTML)</p>
SPOT	Email	New Feature		
SPOT	Email	Fix	Selecting the "Ready - Conveyor" processing context in the Order Status Notifications screen was getting an error.	
SPOT	Email	Addition to Existing	<p>As a SPOT user, I would like to compose emails within a SPOT editor that save as HTM/HTML document</p>	

		Feature	The batch email screen now can load, edit, and save HTML templates directly.	
SPOT	General	Fix	Fixed overflow issue with vehicle mileage entered during the "Post Manifest" function in the route system.	
SPOT	Hotels	Fix	Hotel orders flagged as excluded in the reconciliation screen were still showing on the hotel manifest.	
SPOT	Hotels	Fix	Hotel statements were showing incorrect base price and tax total for localities with a secondary tax rate.	
SPOT	Hotels	Addition to Existing Feature	As a SPOT user, I would like the hotel manifest tax/enviro amounts to not include any discounts for calculations SPOT now has the ability to show the printed (non-discounted) price, enviro, and tax for discount-at-billing hotel invoices on the hotel manifest.	Store Settings > Hotel Settings > Hotels > (Hotel) > Show Printed Invoice Amounts On Manifest
SPOT	HSL	Change	As a SPOT user, I would like to resize the HSL association screen and have it dynamically scale to size. F3 Menu->HSL->HSL Association screen is now resizable and will scale to the contents to fit the window.	
SPOT	Inventory	Addition to Existing Feature	As a SPOT user, I would like to filter my inventory sessions into sections. A range of rack locations can now be specified for each scan inventory session. If no range is specified, all racked invoices will be included in the expected list, as before.	
SPOT	Issue Manager	Addition to Existing Feature	As a SPOT user, I would like the orphan garment to generate and maintain a created date. Store a Created Date for orphan garments (either through Garment Search->Orphans->Add Orphan or through Issue Manager->(New Issue)->Garment Details). Show this date on the Orphan Garment Search results instead of the updated date. The "Print Detail Slip" on F2->Search->Garment Search->Orphans now uses the Created Date instead of the Modified Date.	
SPOT	Marketing	Fix	Fixed a problem that caused route-only customers to be issued new customer coupons repeatedly.	
SPOT	Markin	Fix	When marking in a new order and searching for an existing HSL to initiate the order, SPOT was no longer including that HSL as the first item of the new order.	
SPOT	Markin	Addition to Existing Feature	As a SPOT user, I would like QC flags to also support the detail step The markin screens now support QC Flag functionality.	
SPOT	Order View	Fix	It was possible to perform a reverse pickup on an archived invoice.	
SPOT	Printing	Change	As a SPOT user, I would like new batch printing option for workstation or store settings Removed the BATCHPRINTENABLE VTC setting to activate	Site Settings > Report/Printing Settings > Enable

			SPOT's batch printing feature, and instead implemented settings at store & workstation levels.	Batch Printing (Disable/Enable) Workstation Settings > Report Settings > Enable Batch Printing (Use Store Setting/Disable/Enable)
SPOT	Printing	Fix	Receipt template has cutoff fields Fixed default register and customer receipts from cutting off the first letter of the word on "Amount Tendered" and the card type.	
SPOT	Printing	Addition to Existing Feature	As a SPOT user, I would like a special orphan garment info invoice style printout. A "Print Detail Slip" button has been added to the Orphaned Garments screen, which prints a slip containing the main information about the selected orphaned garment.	
SPOT	Reports	Fix	Customer Profiling - Fixed issue where items selected from a list (Discount Groups, Coupons, Stores, etc), and that contained commas (,) were not included in the report results.	
SPOT	Reports	Fix	HSL by Customer Report - Found in both 'Customer' and 'Production' sections of the Report Gallery, this report has been corrected show the correct "Times Used" data.	
SPOT	Reports	Fix	Production reports will now correctly calculate the user minutes worked in 'Production'.	
SPOT	Reports	Fix	The Daily Report was getting an error if price changes involving large amounts were included in the report data.	
SPOT	Reports	Fix	"Coupon Analysis" report was incorrectly displaying multiple use coupons as if they were manual coupons.	
SPOT	Reports	Fix	Fixed - RouteTrac Customer Detail/Summary report was not counting bag pickup events.	
SPOT	Reports	Addition to Existing Feature	As a SPOT user, I would like an unpaid PNP orders report. Reports Gallery > Sales > Current PNP Orders - New report that will display all PNP orders or payment exceptions that have an outstanding balance regardless of the date.	
SPOT	Reports	Fix	Fixed an error that was occurring when running Pickups By Item or Dropoffs By Item when archive data was used.	
SPOT	Reports	Fix	Fixed an issue that caused the restoration reports to fail if using archive data and grouping by room.	
SPOT	Rewards	New Feature	As a SPOT user, I would like a reminder at pickup within x days of renewal for a rewards user Prompt for reminder at pickup within x days of renewal for a rewards user. Generate a renewal order if accepted and mark for pickup. To use: 1) Make sure you have a customer rewards profile (Company Settings->Customer Rewards Settings->Customer Rewards Profiles) that have "Can Renew?" checked.	Company Settings->Customer Rewards Settings->Customer Rewards Profiles->Can Renew. Company Settings->Customer Rewards Settings->Customer Rewards Profiles->Renewal Reminder

			<p>2) Make sure the "Renewal Reminder" is set to a non-zero value in the customer rewards profile.</p> <p>3) Create rewards signup and renewal items in the price table and associate those items to your rewards profile. See the "Rewards Signup" and "Rewards Renewal" fields in the definition of the item.</p> <p>4) Set Store Settings->Customer Rewards Settings->Prompt for Renewal at Pickup to Enabled.</p> <p>TO SIGNUP: - At markin, specify a "Rewards Signup" item. The Rewards Signup window will appear. Complete it and save the order.</p> <p>- At pickup, if the customer is within x days of expiration for their rewards program and the "Prompt for Renewal at Pickup" is checked, SPOT will ask if the customer would like to renew their membership program. If yes, then the Renew Rewards Program window will appear. On completion, SPOT will immediately create a new order and mark it for pickup.</p>	<p>Store Settings->Customer Rewards Settings->Prompt for Renewal at Pickup</p> <p>Price Table->(Item Definition)->Rewards Signup.</p> <p>Price Table->(Item Definition)->Rewards Renewal.</p>
SPOT	Rewards	Addition to Existing Feature	<p><i>As a SPOT user, I would like certain coupons to be limited to a specific rewards program.</i> New setting to limit coupon usage to a specific customer rewards program. If the setting is set with any value, the coupon will only appear in Order View for selection if the customer belongs to one of the specified customer rewards programs.</p>	<p>Company Settings->Markin Settings->Coupons->(Coupon Definition)->Restrict to Rewards Programs.</p> <p>(If nothing is set, the coupon is allowed for all customers).</p>
SPOT	Rewards	New Feature	<p><i>As a SPOT user, I would like a customer to be a VIP member if they are in a certain rewards program</i> For Customer Rewards, there is now an option to automatically register a customer as a VIP customer if they are a member of the rewards program.</p>	<p>Company Settings->Customer Rewards Settings->Customer Rewards Profiles->(Profile)->Mark Participating Customers as VIP Customers.</p>
SPOT	Rewards	New Feature	<p><i>As a SPOT user, I would like the discount group to be automatically assigned by rewards program</i> FOR THE New Rewards program membership signup and renewal process: - If a customer signs up for a given rewards program and within the rewards profile the Discount Group field is set, the customer will automatically join the discount group. The discount group field in customer view is then disabled since membership in the discount group is tied to membership in the rewards program.</p>	<p>Company Settings->Customer Rewards Settings->Customer Rewards Profiles->(Profile)->Discount Group.</p>
SPOT	Rewards	New Feature	<p><i>As a SPOT user, I would like a "you could have saved x" dialog at the end of markin</i> Added prompt to evaluate whether a customer would have saved</p>	<p>Store Settings->Customer Rewards Settings->Rewards Profile - Signup Offer at Markin</p>

			<p>money if they were a member of a specified rewards program (evaluated at mark-in completion). If yes, then initiate the signup process. If the signup process is then completed, the rewards signup item will be added to the current invoice. Selecting 'Finish' once again will commit all changes. If the markin is cancelled after the signup process is initiated, all customer settings affected will revert to their previous values and no signup will take place.</p> <p>NOTE - The prompt will only appear if the customer would be receiving a benefit for signing up.</p> <p>NOTE - this functionality at present is only available in Touch Screen-Extended Markin. It will be added to the other markin methods in a future release.</p>	<p>This setting works in conjunction with:</p> <ul style="list-style-type: none"> - Company Settings->Customer Rewards Settings->Customer Rewards Profiles - "Can Expire/Renew" (must be set) - Discount Group and/or Best Available Coupons must be set; otherwise, the evaluation will not yield any different price for the visit and no signup offer will take place. - At least one item in the active price table must include the "Rewards Signup" field pointing to the specified rewards profile in "Store Settings->Customer Rewards Settings->Rewards Profile - Signup Offer at Markin".
SPOT	Rewards	New Feature	<p><i>As a SPOT user, I would like "you could have saved x" or "you have saved y" on the receipt for rewards customers.</i></p> <p>New "You Could Have Saved X" and "You Have Saved X" fields to the receipt template (Company Settings->Report/Printing Settings->Document Templates->Receipt Templates).</p> <p>"You Could Have Saved X" (receipt template field found in Receipt->Rewards->YouCouldHaveSavedX) specifies how much the customer would have saved for all orders picked up if they were a member of a rewards program as specified by Store Settings->Customer Rewards Settings->Rewards Profile - Signup Offer on Receipt.</p> <p>"You Have Saved X" informs customers who do belong to a rewards program how much they have saved for all orders picked up. This field is found on the receipt template at Receipt->Rewards->YouHaveSavedX.</p> <p>If no savings are available, the field will be blank. You can use an Evaluatelf condition in the template to hide the entire line (reference the respective field as the condition of the Evaluatelf).</p> <p>It is possible for both values to be present if the customer</p>	<p>For the "You Could Have Saved X" field, the following field must be set:</p> <ul style="list-style-type: none"> - Store Settings->Customer Rewards Settings->Rewards Profile - Signup Offer on Receipt <p>This governs which rewards program is used to evaluate how much the customer might have saved if they were a member of the program.</p>

			<p>belongs to a rewards program that differs from the one being evaluated for potential savings.</p> <p>For either field, the profile in Company Settings->Customer Rewards Settings->Customer Rewards Profiles must have either the "Discount Group" and/or the "Use Best Available Coupon" set. Otherwise, the rewards profile will not generate any pricing differences; hence, no value would be present for either "You Could Have Saved X" or "You Have Saved X".</p>	
SPOT	Rewards	New Feature	<p>As a SPOT customer, I would like to manage customer rewards via a dialog from customer view</p> <p>New Customer Rewards management screen with additional options. To access, go to Customer View->Details Tab and click on the new Customer Rewards button.</p> <p>To configure new options for your customer rewards programs, go to Company Settings->Customer Rewards Settings->Customer Rewards Profiles.</p>	
SPOT	Rewards	Addition to Existing Feature	<p>As a SPOT user, I would like to issue a customer reward after x visits.</p> <p>Added "Evaluate by Visits" to Customer Rewards Profile. Points are accrued by unique daily visits (1 point per each day in which at least one order was marked in).</p>	
SPOT	Routes	Fix	<p>Fixed problem where using the "Hide Prices on Manifest" setting prevents using the 'PrepayOrders During Manifest Creation' setting.</p>	
SPOT	Routes	Change	<p>As a Route user, I would like the invoice's original promise date to be visible next to the invoice number on the manifest</p> <p>The invoice promised date is now available on the route manifest. Note that this will require the modification of the customer's route manifest crystal reports .rpt file. The field name is "PromisedDateOrig".</p>	
SPOT	Routes	Addition to Existing Feature	<p>Route Post Out Screen - Give drivers the ability to Unrack an item within the post out screen.</p> <p>Route Post Orders - Added ability to unrack non-delivered orders from this view. This is available to routes that rack to a specific location. The user can select among "Unrack Mode: Off" (disabled), "Unrack Mode: Scan" to unrack by scan (which will process price-later or cash orders), or "Unrack Mode: Unposted" which will unrack all orders not selected to post (and which will not process price-later or cash orders) after the posting process is completed.</p> <p>Note - the "Unrack Mode: Scan" will also flag the orders as non-delivered, and prompt for a reason if these are established.</p>	

SPOT	Routes	Change	<p>Route Recon Screen – Give drivers the ability to Unrack an item within the recon screen.</p> <p>Extended the 'Relocate' function in the Route Reconciliation view to allow an 'Unrack' option. Also added a "Scan Mode" button, which will toggle between "Rack" and "Unrack", that will allow scanned orders belonging to the route to be unracked, as well.</p>	
SPOT	Routes	Fix	<p>Fixed - Route Offload from dispatch conveyor will now include sub-stop data.</p>	
SPOT	Routes	Fix	<p>The route recon will now treat the visit days defined by stop as the final authority, bring this into conformity with the route manifest code. Previously, the route recon used the "Use Customer" route rules visit days as the final authority, whereas the manifest code itself was the other way around (the stop visit days was the final say). This update brings these two functions into sync.</p>	
SPOT	Routes	Change	<p>On-Demand Route Scheduler - The customer memo field now supports up to 1000 characters.</p>	
SPOT	Routes	Change	<p>As a Route user, I would like to increase the size & bold font for the verbiage 'On Demand' on the manifest</p> <p>The "On Dmnd" text for on-demand route stops on the manifest will now display in a bold, larger font.</p>	
SPOT	Routes	Addition to Existing Feature	<p>As a SPOT user, I would like the locker pin added to the delivery manifest</p> <p>Added locker pin to the route delivery manifest.</p>	
SPOT	Routes	Change	<p>As a SPOT user, I would like the ability to shutoff the On Demand detailing feature that associates the inventory to the location the CSR is logged into. Instead I would like all On Demands associated with the Route Master store</p> <p>On-Demand Route customer, with a route visit scheduled for that day, when an order is marked into another store, that order can be automatically attributed to that route's store when 'Prompt for Counter/Route Order' is set.</p>	Workstation Settings -> Markin Settings > Prompt for Counter/Route Order - On Demand
SPOT	Search	Change	<p>As a SPOT user, I would like the 'Promised by Date' advanced search to also consider time then allow date/time sorting</p> <p>The "Promised By Date" advanced search now displays the promised time as well as the date, and sorts properly by default and when the column header is double-clicked.</p>	
SPOT	Search	Addition to Existing Feature	<p>As a SPOT user, I would like the garment search to allow column sorting.</p> <p>F2->Search->Garment Search now supports column sorting (both ascending and descending) for garments and orphan garments. To sort, double-click the column. To reverse the sort order, double-click the same column again. The first sort of any column is in ascending order.</p>	
SPOT	Search	Addition to	<p>As a SPOT User, I would like the garment search to have a</p>	

		Existing Feature	<p>process step column and a filter to show in process orders only by default. F2->Search->Garment Search now includes a toggle button to switch between "Show In Process Only" and "Show All Orders".</p> <p>F2->Search->Garment Search - The results now show the Production Step name in the Status column instead of the internal status name. Previously, you would only see "In Process", "Ready" or "Sold". Now you will see the more descriptive name that corresponds to the last process step the order went through (e.g., "Assembly", "On Truck", etc.).</p>	
SPOT	Search	Fix	Double-clicking the ID field in F2 Search->Garment Search->Orphan Garment tab will now sort numerically (e.g., 10 comes after 9, not directly after 1 as it would in an alphabetic search).	
SPOT	Setup	Fix	Server setup was causing customer notification defaults to reset to original values.	
SPOT	Setup	Change	<p>As an API user, I would like SPOT server setup to build API settings automatically CustomerConnect Profiles no longer require an import file. Server Setup will now update profiles as needed.</p>	
SPOT	SMS	Fix	Sending an SMS to a customer with multiple Cell/Mobile numbers was not sending to either in certain cases.	
SPOT	Uncategorized	Fix	It was possible to sell a route order without paying for it if the customer had a credit card on file with its usage set to "Never".	
SPOT	Uncategorized	Change	The customer import will now accept "MARKETINGDISABLED" as a column header in addition to "DISABLEMARKETING".	
SPOT	Uncategorized	Fix	Specifying a scheduled task starting date or ending date greater than 6/6/2079 caused SPOT to crash.	
SPOT	Uncategorized	Fix	<p>As a SPOT Support representative I would like remote services to not allow an order to be create with ItemTrackingKeys already on a live order SPOT Remote Services - The invoice push will now check (and reject) for duplicate HSL/ItemTracking values for both existing open orders and within the items of the new invoice itself. This constitutes a new service version, and requires an update (client-side) of the Service ID.</p>	
Conveyor Client	General	Fix	Conveyor Client (MP) will now correctly use extended Label data tokens in the main label definition fields. This will allow normal labels to better utilize the custom/extended fields previously available for the long MP labels.	
Conveyor Client	General	New Feature	<p>As a MP User, I would like to have the ability to send a store's order to a specific offload arm MP Storage Conveyor - Added to the client the means to assign an extraction arm by store/route/hotel.</p>	

CustomerConnect	General	Change	Each template site distinctively names their local storage tokens to prevent trying to use the same token on multiple tenants.
CustomerConnect	General	Change	As an API user, I need the states to be a selectable dropdown. States is now a drop down selection which is retrieved from the API. New API function call - GetStates.
CustomerConnect	General	Change	As an API user, I need phones and postal code masks to be specific to the locality. Localities are now properly cached and used based on the account's settings (US/UK/CA). Data Formats in profile settings. Changed Phone/Postal Code to use the specified formats.
CustomerConnect	General	Fix	Fixed "Contact" form.
CustomerConnect	General	Fix	Phone number fields now allow just numbers or a formatted phone number.
CustomerConnect	General	Fix	Fixed an error that was shown when using "Forgot Password".
CustomerConnect	General	New Feature	As a CustomerConnect user, I would like a pickup postback page to be used from OTS emails. Added a pickup request success/failure page. This would be the returnUrl page from the pickup request link.
Dashboard	General	Addition to Existing Feature	As a Dashboard user I would like to see a "Score Card" in showing the current weeks presser production based on ProductionTrac Totals. Added ProductionTrac Score Card to the production tab.
Dashboard	General	Fix	Fixed an issue where the Lost Tuna campaign would timeout on databases with a large number of customers with emails.
Dashboard	General	New Feature	As a Dashboard user, I would like analytics data for optimal time to send emails for best open rate. Added new widget: Email Tracking by Time. This will show the sent/opened/failed/open % by hour or by day of week.
Locker Client	General	Fix	Sold orders that had been assigned to a locker reappeared on the locker screen without a locker number if a reverse pickup was performed on them.
OTS	General	Addition to Existing Feature	As an OTS user, I would like a 'BatchID' column added to the marketing tab BatchID has been added to the Marketing tab.
OTS	General	Change	As an OTS user, I would like Batch Processor to automatically delete old log files. Log files will now be automatically deleted after 60 days.
OTS	General	Fix	@DELDAYSCAL will now properly generate even when there is only a single record in the data set.
OTS	General	Fix	Batch Info is now correctly loading regardless of whether @BatchName or @BatchID tokens are in the template.
OTS	General	New Feature	As an OTS user, I would like anniversary campaign logic based on signup date or first visit date. Added new "Anniversary" campaign. This will contain all

			customers who have the specified date type (Signup, First Visit, or Route Signup) between the Month/Day period select and the date is at least 1 year in the past.	
ProductionTrac PC	General	Fix	ProductionTrac Daily Production & Commission reports are all updated to reflect the latest PT functions, including calculating "Commission" by points/pieces/currency, point splitting for reworks, etc.	
Reports Queue	General	Fix	The default end time when creating a new scheduled task is now 11:59:59 PM, which fixes the problem where created tasks were not running because the end time was the same as the start time.	
Route Mobile Client	General	Change	As a RTM client user, I would like the instructions to word wrap when they are too long to fit the screen RTM - Route Stop instructions displayed on the main view as part of the stop details will now wrap onto multiple lines.	
Route Mobile Client	General	Fix	RTM - Fixed sign-out view to disallow F12 until the control is ready to proceed. This fixes, among other issues, the error that results if the weather prompt is skipped.	
SPOT API	General	Change	As an API user, I would like CRM events to be recorded for certain transactions. CRM entries will now be created for the following events: Signup Account Update Login Pickup Request Suspension Request	
SPOT API	General	Change	As an API user, I would like the pickup instructions memo to expire the day before the next delivery date. PickupRequest - The cleaning instructions will now expire the day before the delivery date or if the delivery date is unknown it will expire 2 days after the pickup date.	
SPOT API	General	Fix	Signups now properly associate the customer to the correct country for their locality.	
SPOT API	General	Addition to Existing Feature	Added build notes to documentation site.	
SPOT API	General	Fix	Signup clerk should now be the user specified in the CustomerConnect profile.	
SPOT API	General	Change	Pickup instructions subject is now displayed on the popup.	
SPOT API	General	Change	As a SPOT API Developer, I would like store branding to use SPAccountNodeGroup. SPOT - Added "CustomerConnect" as a context type for store groups. API - Profiles can now be tied to the store group. This allows a multi-branded company or even multi-locality company.	
SPOT API	General	Change	As a API user, I need the email field dates to support non-US	

			<p>localization. PickupDate/DeliveryDate on pickup email now will be formatted based on locality.</p>	
SPOT API	General	Change	<p>As a SPOT API developer, I need some documentation improvements. Improved API documentation on creating HTTP requests. Documentation located here: https://developer.spotpos.com/</p>	
SPOT API	General	New Feature	<p>As a SPOT API developer, I would like XML support. API now supports submitting requests as XML.</p>	
SPOT API	General	Fix	Fixed an issue where the API Gateway was appending UTF-8 to the content-type of requests.	
SPOT API	General	Fix	Addressee and AddressTypeID are now correctly returned for Delivery and Billing in GetCustomer().	
SPOT API	General	Fix	GetCustomer() will now return more than 2 phone numbers.	
SPOT API	General	Fix	Sending of customer emails will now work correctly if the settings profile has "Bypass Web Requests" disabled.	
SPOT API	General	Fix	StoreJSON will now properly update an existing value if it exists.	
SPOT API	General	Fix	The time entry of events will now correctly match the local time determined by the time zone setting in SPOT>Location Information.	
SPOT API	General	Addition to Existing Feature	<p>As an API user, I would like the delivery date to be returned with the pending pickups. Added DeliveryDate to PendingPickups if the pickup exception is associated to a delivery.</p>
