

Release Notes for Version 7.0.5583

App	Feature	Type	Comments	Settings/Required Changes
SPOT	Assisted Assembly	Fix	Fixed a problem where very complex workflows can cause problems with assisted assembly.	
SPOT	Cash Control	Fix	<i>As a SPOT user, I would like the Bahrain locality to allow up to 3 decimal places for cash credit adjustments.</i> The cash credit adjustment, A/R adjustment, and Payin/Payout screens were not using the correct number of decimal places in certain localities.	
SPOT	Conveyor	Fix	Fixed a problem with the legacy kiosk application that can cause it to fail to sell orders if the user activates the touch screen at particular times.	
SPOT	Customer View	Fix	Fixed an error that happens when viewing orders from Credit Card Payment History	
SPOT	Email	New Feature	<i>As a SPOT Support Technician I need an email settings test button</i> There is now a "Test SMTP Settings" function in Store Settings > Email Settings. It will test the currently entered SMTP (outgoing email) settings by sending a test email to the Reply Address and report on any errors.	Store Settings > Email Settings > Test SMTP Settings > Edit
SPOT	Exports and Utilities	Change	Data Export Service A will now use the item tracking key if the HSL key is not available for invoice detail rows.	
SPOT	Exports and Utilities	Addition to Existing Feature	The initials of the clerk who originally detailed the order have been added to the invoice section of Data Export Service A, with the header "DetailClerk".	
SPOT	Gift Cards	Addition to Existing Feature	<i>As a SPOT user, I would like the Z-Report to include gift card information</i> Z reports will now include count and dollar value of gift cards used and gift cards sold/activated (in the Other Detail section).	If Workstation > Cashier Settings > Checkout Report Fonts is set to Native Printer, no settings changes are necessary. However, if it is set to Windows, then a new checkout template will need to be created under Company > Report/Printing Settings > Document Templates > Checkout, then assigned under Workstation > Report Settings > Printer Assignments.
SPOT	Markin	Fix	Fixed a problem where a brand may be incorrectly assigned to items when using the "10+" quantity button at detail.	

SPOT	Printing	Fix	Fixed receipt print where it failed under certain conditions with customer frequent buyer.	
SPOT	Quick	New Feature	<i>As a SPOT user, I would like to print a pick list during a quick so that orders can be prepped sooner.</i> Added option to print a picklist with ready orders during quick receive to facilitate pickup and drop-off in one trip.	Setup > Program Configuration > Workstation Settings > Mark-in Settings > Print Picklist at Quick.
SPOT	Reports	Fix	Corrected a problem that caused A/R Overdue Word merge presentations (dunning letters) to have extra letters with blank information.	
SPOT	Reports	Change	<i>As a SPOT user, I would like the lost tuna report to have an 'Orders' column available to be available for use.</i> Added an "Orders" column to the data retrieved and presented on the Lost Tuna report.	
SPOT	Reports	Addition to Existing Feature	Invoice number has been added to the "A/R Account Summary" report (for billing groups with "Statement Appearance" set to "Invoice").	
SPOT	Reports	Fix	FIXED - Cash Credit Activity report was not properly displaying in chronological order if run for a period greater than one year.	
SPOT	Reports	New Feature	<i>As a SPOT user, I would like a report or an alert that will show Quicks created by the kiosk that haven't been processed.</i> Added "Kiosk Dropoffs Not Detailed" report as well as "Kiosk Not Detailed" alert and advanced search. These can be used to determine who has dropped off items at the kiosk if the bag tag has been lost.	
SPOT	Reports	Change	CHANGED - The "Coupons by Clerk (Cash Pickups)" report will now display zero-priced orders that had a coupon applied within 15 minutes of the order having been sold. Previously, the report only included orders that still had a balance due and were paid with cash after the coupon was applied, but orders that were reduced to a \$0 balance did not show. These will now display on the report despite having no associated payments.	
SPOT	Restoration	New Feature	<i>As a SPOT Restoration user I need a method to prepay/post to A/R many orders for one customer</i> Added new screen for posting large restoration jobs: Menu > Payments > Prepay or Post Restoration Job.	

			This should be used instead of Order Pickup, which can fail to load if there is too much unsold order data for the selected customer.	
SPOT	Restoration	Change	The "Non-Salvageable Items" screen now is title "Non-Salvageable/Non-Restorable Items".	
SPOT	Restoration	Change	The "Non-Restorable" department will have precedence over the "Non-Salvageable" department if both are present in the price table when creating non-salvageable restoration orders.	
SPOT	Rewards	Fix	Voiding a membership club signup or renewal item was not removing the customer from the membership club	
SPOT	Rewards	Fix	Customers with an expired rewards club membership were still receiving club discounts.	
SPOT	Routes	Fix	RouteTrac view - updated so the "Copy Row to Clipboard" or "Copy Lat/Long to Clipboard" places ", " between the coordinates, instead of "/".	
SPOT	Routes	Fix	Fixed a problem that was preventing removal of defunct route stops left over after customer merging or purges.	
SPOT	Security	Fix	SPOT would crash upon attempting to create a new users group.	
SPOT	SMS	Fix	SMS Replies will now work when using a short code.	
SPOT	SMS	New Feature	<i>As a SPOT user, I would like to use a report to send SMS messages to my customers</i> SMS SPOTQuery Presentation Type	When creating a SPOTQuery, add a presentation type called SMS and set the SMS Message property in settings. Tokens are allowed. See the SPOT Operations Guide for examples of which tokens are supported.
CustomerConnect	General	Change	The page will now correctly load even if social authentication providers are inaccessible (Facebook, Google).	
CustomerConnect	General	Addition to Existing Feature	<i>As a Customer Connect user, I would like to disable the Inventory tab in the template.</i> Added setting to hide "Orders" from the main menu.	Company Settings > CustomerConnect Settings > (Profile) > Edit > General > Orders Menu Enabled
CustomerConnect	General	Addition to Existing Feature	<i>As a Customer Connect user, I would like an option to disable pricing when viewing the inventory tab</i> Added setting to hide pricing on order view.	Company Settings > CustomerConnect Settings > (Profile) > Edit > General > Hide Pricing On Order View
CustomerConnect	General	Change	CustomerConnect will now recognize OnDemand Same Day Cutoff. SPOT store settings will need to be re-saved for this to take effect. This uses the route	SPOT > Program Configuration > Store > Route Settings > OnDemand Scheduler Same Day Cutoff SPOT > Program Configuration > Store > Route

			level setting. If it is not populated it will use the Route Settings level. If neither of these settings is populated, same day pickup is not allowed.	Settings > (RouteName) > OnDemand Scheduler Same Day Cutoff
CustomerConnect	General	Change	The Bootstrap theme file can now be just the lightweight theme file.	
CustomerConnect	General	Change	Delivery calendar will no longer show past dates as available when a pickup date has not yet been selected.	
CustomerConnect	General	Change	If a pickup request fails, a meaningful error message is now displayed rather than a generic message.	
OTS	General	Fix	OTS will now properly log an error when it fails to connect to Twilio.	
OTS	General	Change	OTS will now support sending from a Twilio phone number or short code.	
OTS	General	Change	SMS Exceptions will now correctly go to the SMSExceptions log file instead of the EmailExceptions log file.	
OTS	General	Change	<i>As an OTS user, I would like the style sheets to be moved inline.</i> Styles in the head will now be moved to inline for broader email provider support.	
Reports Queue	General	Change	SMS through Scheduler Service will now support sending from a Twilio phone number or short code.	
SPOT API	General	Addition to Existing Feature	Added IsDefault to the GetPreferences to determine which should be selected by default.	
SPOT API	General	Fix	Fixed an issue in SaveCustomer that was adding unnecessary blank rows into the address table.	
SPOT API	General	Addition to Existing Feature	Added VIPFlag to API Signup/SaveCustomer call.	
SPOT API	General	Addition to Existing Feature	<i>As a SPOT Kiosk user, I would like to use the customer GUID instead of the lexical key for the barcode.</i> Added CustomerIDBarcode to GetCustomer. This is the base64 encoded QR image of the CustomerID.	
SPOT API	General	Change	<i>As a SPOT user, I would like to configure customer connect with dropdowns for store, default route, and cc profile.</i> CustomerConnect profile now supports drop downs for Credit Card Profile and Default Store. Retired Default	

			Store ID setting. For signup, if Default Store is not selected and Default Store ID had been set up previously, it will use the Default Store ID. If neither is setup, the first store in the account is used.	
SPOT API	General	Change	<i>As a SPOT API user, I would like the Default Store ID to default to the first store if the setting is not populated.</i> During signup, if AccountNodeID is not provided and a default store is not set, the signup will occur in the first store found in that database.
