

Release Notes for Version 7.0.5839

App	Feature	Type	Comments	Settings/Required Changes
SPOT	Activity Log	Addition to Existing Feature	As a SPOT Support Tech I would like the Purge utility to leave activity log entries Using the purge utility (under Menu > Tools > Data - Purge) will now leave activity log entries.	
SPOT	Assisted Assembly	Addition to Existing Feature	As a SPOT user, I would like the PPOH by Dept. report to show the relative proportion of pieces scanned by department. Modified the PPOH by Department Group reports to add a percentage of total pieces column over the department groups.	
SPOT	Conveyor	Fix	Fix promised date not properly updating when an order is removed from storage.	
SPOT	Coupons	Fix	As a SPOT user, I would like coupons that are scanned and do not apply, to indicate reason. When a coupon barcode is rejected SPOT will now indicate why (expired or invalid).	
SPOT	Credit Cards	Fix	Fixed minor discrepancy on how A/R cc payments were displayed, whether "error" or "unsuccessful" returned.	
SPOT	Email	Fix	The Visual Invoice sent via email was not showing the proper alteration price if the quantity of the alteration was greater than 1.	
SPOT	Email	Fix	Fix problem that prevented Email Address Manager from scanning large inboxes.	
SPOT	General	Fix	Fix a problem with SPOTSchedulerService that caused 2D customer ID barcodes to not display in the iOS 10 mail client.	
SPOT	General	Fix	Correct Print Bag Tags by Manifest to print the bag tags in manifest order.	
SPOT	General	Fix	Fixed a problem that would cause the Non-Salvageable orders screen to not process the selected orders.	
SPOT	General	Fix	Fixed a query error in the Customer Invoice Detail report	
SPOT	Gift Cards	Change	As a SPOT user, I would like my gift cards to not require an expiration date Expiration date field will no longer appear when paying using a gift card.	
SPOT	Home Page	Fix	Mobile Pickup Requests were not able to be canceled from the Mobile Device Store Pickup Alert screen.	
SPOT	Home Page	Fix	Fix display of production status of individual items in	

			Production Commitment Itemized View	
SPOT	Issue Manager	Fix	Correct problem with Issue Manager when "Never Issue Cash Credit as Refund" setting is enabled.	
SPOT	Launcher	Addition to Existing Feature	As a SPOT Support tech, I would like additional prerequisites to the SPOT Launcher installer. SPOT launcher now includes an option to install prerequisites (.NET Framework, Citrix Receiver).	
SPOT	Markin	Fix	Fixed a problem that created duplicate invoices under very specific circumstances.	
SPOT	Markin	Fix	Automatic splitting by piece count was not occurring at markin in some cases.	
SPOT	Messaging	Fix	Fixed the scroll bars when viewing a reply in Menu > Email/Messaging > App Messaging - View Replies	
SPOT	Reports	Fix	FIXED - Recent changes to the "Coupons by Clerk (Cash Pickups)" caused the report improperly report ALL invoices that had a coupon applied within 15 minutes of pickup. These changes have been reversed and a new report will be added to reflect all orders in this state.	
SPOT	Reports	Fix	FIXED - The Daily Production reports were improperly reporting a user's minutes worked if the user had not clocked out.	
SPOT	Reports	Addition to Existing Feature	Added support for special presentations and map presentations to these reports: All Enabled Customers With Orders.VTX All Enabled Customers.VTX Counter Customers.VTX Customers Set Disabled.VTX Customers with Charity Program.VTX Customers with Custom Fields.VTX Customers With Custom Tax Entity.VTX Customers With Memos.VTX Customers with Ratings.VTX VIP Customers.VTX	
SPOT	Rewards	Addition to Existing Feature	As a SPOT user, I would like to override a reward coupon's expiration date. Added a setting that will display expired reward coupons in Customer View > Reprint Reward. Users with the Modify Rewards Expiration Date security right can change the expiration date and reprint the previously expired reward coupon.	Store > Customer Rewards Settings > Show Expired Rewards
SPOT	Rewards	Addition to	As a SPOT user, I would like the prompt for rewards	"Coupons To Include In Savings

		Existing Feature	program renewal to include the expiration date in the message. The expiration date has been added to the rewards program renewal prompt. The prompt also shows the amount the membership has saved the customer over the previous 12 months.	Calculation" button in Customer Rewards Profile settings dialog.
SPOT	Search	Fix	Pressing the Show Archive button in the Invoice Search screen was causing SPOT to crash.	
SPOT	Search	Addition to Existing Feature	As a SPOT user, I would like to lookup customers by firstname , lastname The ability to look customers up by first name + last name (in addition to last name + first name) has been added to SPOT.	Company Settings > Search/Lookup Settings > Customer Search Settings > Name Lookup Mode
SPOT	Search	Addition to Existing Feature	As a SPOT user, I would like to see item status information on the garment search screen. Added current production status to Garment Search results.	
SPOT	Security	Fix	Fixed a problem where the Force Clock-In setting was ineffective.	
SPOT	Uncategorized	Fix	Added an explanatory message when sending email through SPOT services fails due to incorrect configuration.	
Conveyor Kiosk	General	Fix	Fixed JavaScript error in SPOT.Kiosk when a user tries to lookup by Phone and PIN and fails to enter a PIN.	
Conveyor Kiosk	General	Addition to Existing Feature	As a SPOT.Kiosk user we would like an option to restrict customer lookup to the kiosk store. Added an option to SPOT.Kiosk that restricts customer lookup to the kiosk's home store.	In KioskSettings.Config: <RestrictToHomeStore>Yes</RestrictToHomeStore>
CustomerConnect	General	Change	Fixed an issue that was preventing users from entering a password during signup.	
CustomerConnect	General	Change	Insecure password prompt now correctly uses the same prompt as the Change Password function.	
CustomerConnect	General	Change	Improved CustomerConnect loading of settings. This will now get all settings in a single call which will increase page load speed.	
Data Exports	General	Fix	Duplicate invoice rows were added to the Data Export Service A if an invoice was moved from one hotel to another during the day.	
ProductionTracPC	General	Fix	Fixed a problem where some payroll reports had zero pay rates for time clocked in through ProductionTracPC	
SPOT API	General	Fix	Fixed an error that was being thrown when Web	

			Requests are being used and a DeliveryDate is not provided.	
SPOT API	General	Addition to Existing Feature	<i>As an API developer, I need a function to validate a session token.</i> Added "ValidateToken" function to Q and T paths. This will validate that a session token is valid and it will also return if the user is logged in or not. This can also be used to extend the rolling 20-minute session expiration.	
SPOT API	General	Fix	The Id in IssueAward is no longer case sensitive.	
SPOT API	General	Fix	Fixed an error that was occurring when calling GetPriceTable.
