

Release Notes for Version 7.0.6082

App	Feature	Type	Comments	Settings/Required Changes
SPOT	Adjustments	Fix	Fixed-price invoices adjustments set to apply to "Invoice" were only applying to a single invoice in a visit	
SPOT	Configuration	Fix	Configuration Tracking will now include hiding or un-hiding items in a collection.	
SPOT	Configuration	Fix	Fix the wording of one of the customer rewards profile settings to better reflect its purpose.	Company > Customer Rewards Settings > Customer Rewards Profiles > Settings > Allow signup only if customer has...
SPOT	Configuration	Addition to Existing Feature	<i>As a SPOT User, I would like the option to use a store hours token and node for printing and email</i> Added a Store > StoreHours data field to the Invoice, Quick, Quick Visit, and Detail Visit templates which prints the contents of Setup > Location Information > Store > Hours of Operation. The 'multiline' checkbox will need to be selected when adding this field to a template if there is more than one line in Hours of Operation. Additionally, this data can now be placed in emails using the @STOREHOURS token.	Setup > Location Information > Store > Hours of Operation
SPOT	Configuration	Addition to Existing Feature	<i>As a SPOT user, I would like an option to set a minimum quantity for an upcharge</i> Added a setting to make the default quantity of an upcharge an enforced minimum.	"Enforce Minimum Quantity?" on each Upcharge Item.
SPOT	Item View	Fix	Fixed a problem that made it impossible to remove item adjustments from previously detailed invoices.	
SPOT	Markin	Fix	Fix a bug with HSL mode prompt or forced where adding an alteration to an item can prevent defining an HSL for the next item.	
SPOT	Markin	Fix	Fixed a problem where hiding a category at detail caused the next category to have incorrect items.	
SPOT	Messaging	Fix	Fixed the "Include original message in reply" setting. It is now honored, and has three states: Yes, No, or Prompt. The default if unset is Prompt (to match the old behavior of always prompting regardless of the setting).	Company Settings > Messaging Settings > Include original message in reply
SPOT	Messaging	Fix	The 'App Messaging Replies' screen now sorts properly. The most recent entries will be listed at the top and sort to least recent at the bottom.	
SPOT	Printing	Addition to Existing Feature	<i>Discussion - Adding VAT element and the EX-VAT amount to invoice template</i>	

			A "InclusiveTaxTaxedAmount" data field has been added to invoice and visit document templates.	
SPOT	Quote	Addition to Existing Feature	As a SPOT User I would like to control the ordering of price tables at the start of a quote Added a setting to not sort price table names alphabetically when displaying a quote. Instead, the ordering of price tables in program configuration is used.	Store > Mark-in Settings > Sort Price Table Names for Quote
SPOT	Quote	Addition to Existing Feature	As a SPOT user, I would like to disable the prompt to create invoice from quote. Added a setting to disable converting price quotes to invoices.	Company > Mark-in Settings > Allow Creating Invoice from Quote?
SPOT	Reports	Fix	Corrected the 'Checks Received Report' to list the amount of the check instead of the amount applied to the invoices.	
SPOT	Reports	New Feature	As a SPOT user, I would like to track customer retention for route and counter customers based on a 60 day period. A "Customer Retention" report has been added to the Management folder of Reports Gallery. This shows customer activity levels per monthly or weekly period (Active + New + Reactivated - Inactive) compared to the same month or week of the year before, with net change and percentage.	
SPOT	Reports	New Feature	As a SPOT user I would like a Debit Card Transactions report Added a Debit Card Transactions report (in the Credit Card category). It displays in the same format as Credit Card Transactions, but only includes the Debit Card tender type.	
SPOT	Rewards	Fix	Fixed a scenario that caused customer rewards points to appear to not be accruing properly.	
SPOT	Search	Fix	Fixed a possible crash when exiting invoice search.	
SPOT	Search	Addition to Existing Feature	As a SPOT user, I would like to enter either a 10 or 7 digit phone number into lookup to seamlessly find either type of number. Added an option to cause customer search to expect a full phone number (including the area code). The default is to continue the old behavior of expecting that the user will not enter the area code.	Store Settings > Search/Lookup Settings > Full Length Phone Lookup
SPOT	SMS	Addition to Existing Feature	As a SPOT SMS user I would like to be able to see SMS replies previously marked as Read	

			SMS Replies now has a 'View Read Messages' button to see messages already marked as read.	
Conveyor Kiosk	General	Addition to Existing Feature	<i>As a Kiosk user we need membership card lookup to work even if track markers are omitted from the ClientAccountLookup entry</i> Changed the kiosk to work with membership cards that have track markers in magstrip but not in barcode, as well as membership cards that have track markers in both.	
ProductionTrac PC	General	Fix	<i>As a ProductionTrac user, I would like the timeclock events to round to the nearest minute</i> Fixed ProductionTracPC to record timeclock entries rounded to the nearest minute, to match the behavior of SPOT.	
SPOT API	General	Fix	Fixed - A/R payment email (via API/CustomerConnect) was not correctly formatting the payment amount.
