

Release Notes for Version 7.0.6203

App	Feature	Type	Comments	Settings/Required Changes
SPOT	Adjustments	Fix	Fixed-price invoice adjustments that apply to "Invoice" were doubling in value if "Prompt for Piece Count at Detail" is enabled.	
SPOT	AR	Addition to Existing Feature	As a SPOT user, I would like a 'Drop-off Date' field available for my statement template. A "DropoffDate" field has been added to statement and hotel statement datasets.	
SPOT	Conveyor	Fix	Fixed compatibility problem between AssistedAssembly and automated storage conveyors.	
SPOT	Conveyor	Change	As a SPOT User with a Metalprogetti assembly conveyor, I would like to see the date the invoice was detailed in Assembly Orders On the Assembly Orders tab of Menu > Conveyor > Operations the unused 'Description' column has been replaced with the Detail Date of the order.	
SPOT	Exports and Utilities	Addition to Existing Feature	As a SPOT user, I would like exports to have column headers Added column headers to the data exported by Menu > Tools > Data Import/Export > Advanced > Client Export, Export All Clients, Invoice Export, Credit Card Export, and Summary Export. (HSL Export already had headers).	
SPOT	Exports and Utilities	Addition to Existing Feature	As a SPOT user, I would like our export to have a 'Brand' field and Customer.InstanceID listed. Added columns to SPOT Data Export A: ClientGUID in the customer section provides the customer's globally unique identifier; Brands in the invoice detail section gives the Brands modifier(s) for the item.	
SPOT	General	Fix	"de-de", "fr-ca", and "fr-mc" language tags have been added to CustomerConnect settings.	
SPOT	Home Page	Addition to Existing Feature	As a SPOT user, I would like to see the SMS Replies alert at the top of the list for more visibility SPOT can now be configured to move special alerts (like 'SMS Replies') to the top of the list.	Store Settings > Site Defaults > Display Special Alerts At Top
SPOT	HSL	Change	As a SPOT implementation team member, I would like the HSL Import to allow column sorting. HSL import grid can now be sorted by columns.	

SPOT	Markin	Fix	Fixed a problem where some controls became unresponsive after using the Split button on Quick Receive.	
SPOT	Markin	Fix	Fixed a problem where an incompletely created customer rewards profile could cause errors when detailing.	
SPOT	Order View	Fix	Removed the unused 'Claim' and 'Step' counters from Order View.	
SPOT	Order View	Fix	Fixed a problem where entering an empty coupon barcode caused a coupon to be selected from the list.	
SPOT	Printing	Fix	Fixed an error when printing visits at detail.	
SPOT	Quick	Fix	Fixed a scenario where promised dates are incorrect when changing invoice modes.	
SPOT	Reports	New Feature	<p><i>As a SPOT user, I would like the new customer reports to include blank clerk ID signups and origin of signup.</i></p> <p>A "New Customers by Signup Origin" presentation has been added to default reports in Customer folder of Reports Gallery.</p> <p>A "New Customers by Signup Origin - RQ" report has been added to Customer folder of Reports Gallery.</p>	
SPOT	Reports	Addition to Existing Feature	<p><i>As a SPOT user, I would like new customer reporting that distinguishes the customers by how they signed up</i></p> <p>A "SignupOrigin" column has been added to the ClientAccount table, to provide reporting visibility on customers signed up in SPOT, CustomerConnect, mobile apps, or Route Manager.</p>	
SPOT	Rewards	Addition to Existing Feature	<p><i>As a SPOT User I would like the option to print progress slips for AR/Cash Credit based rewards</i></p> <p>Customer Rewards programs that are redeemed with A/R Credit or Cash Credit will now print progress slips if the option is selected in the profile and the Order Pickup screen is used. (They will never print when posting a route, as the customers are not likely to be present to receive the slips.)</p>	Company > Customer Rewards Settings > Customer Rewards Profiles > Settings > Print progress slip if points not reached.
SPOT	Rewards	Addition to Existing Feature	<p><i>As a SPOT user, I would like an activity log entry when an award coupon is printed.</i></p> <p>There will now be an entry in the Activity Log when a reward coupon is printed.</p>	

SPOT	Routes	Fix	Route orders that had declined credit card payments from the prepay function were erroneously adding another payment exception when they were also declined at route posting.	
SPOT	Routes	Fix	<i>As a SPOT user, I would like the route management screen to keep my place when I perform a 'Remove Stop'</i> Removing a route stop will no longer reset the view to the top of the list of stops.	
SPOT	Search	Addition to Existing Feature	<i>As a SPOT user, I would like to choose if rating colors will override route/VIP colors</i> Added a setting to cause Customer Rating colors to override route or VIP colors.	Company > Customer Settings > Rating colors override other colors
SPOT	Setup	Fix	Fixed a possible run time error in the Store Groups editor.	
SPOT	Setup	Fix	Customer Connect - Under certain circumstances, the On-Demand time ranges would not be removed from the site when removed from SPOT. This is now fixed. Also revised so the sequence in SPOT is retained through the interface.	
SPOT	SMS	Addition to Existing Feature	<i>As a SPOT User, I would like SMS to support sending texts to different countries than the origin</i> Added an option to SMS Profiles to handle the case where Twilio does not have sending numbers available for the desired country.	Company > SMS Settings SMS Profiles > Phone number has different country code than recipients
Conveyor Kiosk	General	Fix	Fixed an issue with the kiosk menu buttons.	
CustomerConnect	General	Addition to Existing Feature	<i>As a Customer Connect user, I would like an option to turn on/off the gift card balance check.</i> A "Gift Card Balance Check Enabled" setting has been added to CustomerConnect Settings > General section.	
CustomerConnect	General	Addition to Existing Feature	<i>As a templated CustomerConnect client I would like a comments box on signup</i> A "Comments on Signup" checkbox has been added to CustomerConnect Settings > Signup configuration.	
CustomerConnect	General	Addition to Existing Feature	<i>As a CustomerConnect user, I would like Google Analytics integrations.</i> A "Google Analytics" section has been added to CustomerConnect Settings > General configuration.	CustomerConnect Settings > General > Google Analytics > Google Analytics Enabled CustomerConnect Settings > General > Google Analytics > Account Key CustomerConnect Settings > General > Google

				<p>Analytics > Cross Domain Linker CustomerConnect Settings > General > Google Analytics > Cross Link Domains</p> <p>Cross Link Domains is optional.</p> <p>The list of domains in the last setting will be delimited by semicolon, if more than one is specified, like this:</p> <p>Firstdomain.com;seconddomain.com;thirddomain.com</p>
ProductionTrac PC	General	Fix	ProductionTracPC in remote mode was not updating the screen after a successful scan in Pressing screen	
RouteTrac	General	Fix	Disable 'Deliver All' button when there are no orders to deliver.	
SPOT API	General	Fix	The API signup call was returning "An error has occurred." if CustomerConnect was configured to send a customer email on signup and "Bypass Web Requests" was turned off	
SPOT API	General	Change	Route pickup instructions created via the API will no longer initially have an expiration date, but will later be set to expire at the end of the day of the first markin after the pickup request.	
SPOT API	General	Addition to Existing Feature	"CustomerType" and "Contact" fields have been added to customer request type in the API.	
SPOT API	General	Addition to Existing Feature	<p>As a SPOT API user, I would like the API to accept credit card token data.</p> <p>The cust.CreditCardsToSave collection can now accept a CC token if externally generated. The new property is called .Token, and if set will save as such. Note that the .Number property must contain EITHER a full masked card number (i.e., 411111*****1111) OR a normal "Credit Card Info/Summary" type entry (i.e., VISA *1234 or MC *5454).</p>
