

Release Notes for 7.0.12087

App	Feature	Type	Comments	Settings/Required Changes
SPOT	AR	Fix	Inactive A/R customers could unexpectedly get a new statement generated if an old archived payment had never appeared on a statement	
SPOT	Coupons	Change	Allow combining discount group and auto award (e.g., click-to-redeem) If SPOT is configured so that coupons override discounts when both are present, the discount will still be active until the coupon has value.	
SPOT	General	New Feature	As a SPOT user I want to email and export item images captured using SPOTtrac Added ability to save HSL Photos from SPOT to the user's PC, or to email to the customer. Also added an HSL Photos button to Item View to quickly access this feature.	Store Settings > Email Settings > HSL Photo The following extra email tokens are available in addition to the usual customer-related tokens: @HSLID > The HSL number @HSLPHOTODATE > The date the photo was uploaded @HSLCOMMENT > The comment entered with the photo, if any @HSLCLERK > The clerk that took the photo @HSLPHOTO > The photo itself (resized to 1024x786 pixels if larger)
SPOT	HSL	Addition to Existing Feature	Add a HSL search when in Customer View Added a Quick Search box to Customer View > Details > Heat Seal Items. As you type characters from the Tracking ID (Heatseal number) the HSL Items list will position at the first Tracking ID starting with those characters.	
SPOT	Markin	Addition to Existing Feature	API - Change Locker Special Instructions to also show up at the time of Detail Locker dropoff instructions are now appearing consistently when detailing after a locker dropoff event.	
SPOT	Notification Center	Fix	Location Settings > Company > Store Groups will no longer allow adding a store to multiple groups in the same context, which is an incorrect configuration of the groups feature.	
SPOT	Notification Center	Fix	Route cancellations that are not tied to a specific route did not show in the Notification Center or Customer View Route tab	
SPOT	Pickup	Change	In pickup, cancel now allowed of a price later order selected by mistake.	
SPOT	Reports	Fix	Fixed a problem in the Route Trend report that caused some customers to display as static (S) instead of dynamic (D).	
SPOT	Reports	Fix	Route Reminder report was not showing route names or correct stop numbers for customers on service plans	
SPOT	Reports	Change	Gift Cards - Sold to also show "increment" operations (value added) The "Gift Cards - Sold" report now also shows when existing cards are incremented in value.	

SPOT	Reports	Addition to Existing Feature	A "Gift Card Summary" section has been added to the "Cashout Summary (By Date)" report, which shows gift cards sold, incremented, adjusted, and redeemed.	
SPOT	Routes	Addition to Existing Feature	Surface Delivery Verification Photo in SPOT RouteTrac view New ViewPics button in Menu>Delivery>RouteTrac which enables you to view images taken on the route trac device in a thumbnail viewer. A new column "image" will indicate if there are images on file.	Menu>Delivery>RouteTrac>ViewPics
SPOT	Timeclock	Change	SPOT will now remove a timeclock entry upon clock out that would result in the same clock in and out time after rounding is considered. A message appears to the user and the removal is logged. Previous timeclock entries with the same in and out time have been removed from the Time Clock Employee Detail report.	
SPOT	Uncategorized	Fix	Invalid email addresses were being generated in the RMDC export file if the pickup clerk has a space in their first or last name, which meant that no employee information was sent to the end customer.	
SPOT Scheduler	General	Addition to Existing Feature	Exclude VIP/Drop-off bags from Order Ready and Aged Inventory Notifications Items in price tables can now be flagged to "Exclude From Notifications". If an order consists of only such items (such as a VIP bag), it will not be considered when sending Order Ready notifications.	
SPOT	Credit Cards	Change	SPOT - Reviewed and revised the duplicate-transaction metrics to enhance the reliability of trapping duplicate card transactions	
SPOT	Credit Cards	Change	Minor revisions for Windcave token processing in SPOT client
