

## Release Notes for 7.0.10207

App	Feature	Type	Comments	Settings/Required Changes
SPOT	AR	Addition to Existing Feature	<b>When A/R statements are issued as PDFs and invoices are included, then attach invoices as a PDF to the statement.</b> SPOT now has the ability to attach invoices in PDF format when using the "Email Invoices" function of the View Statements screen, instead of embedding them in the email in HTML format.	Store Settings > A/R Settings > E-Mailed Invoice Format
SPOT	Assisted Assembly	Fix	Changed error text for a prepaid order in Assisted Assembly restoration mode from "Order Has Payments" to "Prepaid Order" so it will fit in the available space.	
SPOT	Configuration	Fix	Fixed a false program configuration concurrent change warning when modifying settings that use custom views (such as coupon settings) .	
SPOT	Configuration	Fix	Fixed a problem with changing between stores while in Program Configuration that caused saving changes to fail.	
SPOT	Configuration	Fix	Fixed a problem where all conveyor route offloads were checking Customer Specific Route Rules even if the setting was not enabled.	Store > Conveyor Settings > Offload Uses Customer Specific Route Rules
SPOT	Configuration	Fix	"Hide" button will be available for Price Tables again.	
SPOT	Email	Fix	<b>As a SPOT user, I would like to utilize the @UPDATELINK token in Email and SMS templates</b> @UPDATELINK can now be used in all emails originated directly from SPOT, not just those originated by Store > Credit Card Settings > Customer Alerts (Email/SMS)	
SPOT	HSL	Fix	Fixed a problem during detail where an over length HSL was still accepted.	
SPOT	Markin	Addition to Existing Feature	<b>As a SPOT user, I would like the ability to set a % deposit requirement for describe-and-price items, as with normal items</b> The ability to require a % deposit for describe-and-price items has been added to SPOT	Company Settings > Mark-in Settings > Price Tables > (Price Table) > Departments > (Department) > Categories > (Category) > Describe & Price % Deposit required
SPOT	Markin	Fix	SPOT will remember the previous value for Original Invoice # when redetailing	
SPOT	Pickup	Fix	SPOT showed an "Invoice Error 6" if the clerk changed an invoice in Order View after selecting an invoice in the list of orders to be picked up and canceling out of the Tender window.	
SPOT	Reports	Fix	The "Debit Card Transactions" report was combining multiple payments in the specified date range together into one payment if the customer name and amount were the same.	
SPOT	Reports	Change	<b>As a SPOT User I want the Direct Receives by Date report to give the original invoice number</b> Direct Receive will now add the original invoice number to the invoice ExternalID as well as to a manual comment. The Direct Receives by Date report will display the invoice external ID in the "Orig Inv" column.	
SPOT	Reports	Fix	The "Checkout Summary (By Date/Drawer)" report was including gift card liability in the tender section when a gift card was sold.	

SPOT	Routes	Change	<b><i>As a user of SPOT service plans, I would like the ability to retain the service plan assignment when I change a customer's route address in SPOT.</i></b> Clerks can now choose to retain (or remove) the service plan assignment when they change the route address in SPOT of a customer belonging to a service plan.
SPOT	Routes	Fix	Route setting to "Suppress Customer Save Warnings" will now function in the "Stop View" as well as the customer view. Also clarified "Use Customer Specific Route Rules" setting so "Optional (Default No)" setting is adhered to as far as possible.
SPOT	Routes	Change	Store Settings > Route Settings > "Display Pickup Request Instructions at Markin" setting now has a "Never" option. This will suppress the general (or driver's) instructions that show during the process. Note that the new distinct "Cleaning Instructions" are tabled as customer memos, and these will show independently of this setting.
SPOT	Routes	Fix	Route cancellations that have not expired will follow the customer to the new route when using the SPOT Delivery tab or Customer View to remove the customer from a route and add them to a new route.
SPOT	Routes	Change	SPOT will now support defined auto adjustments for routes belonging to other stores than the store where the route orders are marked in.
SPOT	Security	Fix	Fixed a security issue allowing users to access Program Configuration categories beyond those that they have permission to access.
SPOT	SMS	Fix	SMS payment receipts were not populating the customer ID into the database, resulting in a "we cannot identify your number" reply if the customer replied to the text
SPOT	Splitting	Fix	Fixed a problem that caused a split order to have a production promised date equal to the promised date, even when the original order did not.
SPOT	Tags	Addition to Existing Feature	<b><i>As a SPOT user, I would like the new production promised date tag tokens to also be available in the layout editor</i></b> Added production promised date tag tokens to the list in the tag editor. These were already available but unlisted:  @PRODDAYOFMONTH = Production Due Day of Month @PRODTIME = Production Due Time @PRODDAY1 = Production Due Day - 1 @PRODDAY = Production Due Day Name @PRODMONTHNUMBER = Production Due Day Month Number @PRODMONTHNAME = Production Due Day Month Name
SPOT	Utilities	Fix	Fixed a problem with the formatting of store hours in SPOT Scheduler order ready emails.
API	General	Fix	Removed an incorrect referenced to a "GetStoreList" call in the API documentation. The correct call is GetStores.
API	General	Change	On CCOF 'decline link' expiration, go to CC3 login Expired "CCOF Decline Link" will redirect to CC3 login
CustomerConnect 2.x	General	Fix	Fixed - Email tokens for route address fields are not populating correctly
Delivery Console	General	Fix	Fixed - DelCon Manifest shows "PICKUP REQUESTED" when a static pickup customer has an on-demand delivery.

RouteTrac Client	General	Fix	Fixed - RTM Requested Bag Pickup pop up still shows up for scheduled stops when there's an on-demand delivery
