

## Release Notes for 7.0.12258

App	Feature	Type	Comments	Settings/Required Changes
SPOT	AR	Change	Statement site phone field expanded beyond 15 characters. statement3.rpt site phone field expanded in length.	
SPOT	Conveyor	Change	The delivery arm selection button in the Offload tab of Conveyor Operations now displays selected arms more clearly, and is aware of both store and route default delivery arm settings.	
SPOT	Conveyor	Fix	Recent change to the Offload tab of Conveyor Operations made it so that orders could not be offloaded if the conveyor had no arms configured.	
SPOT	Conveyor	Fix	Conveyor offload arm selection changed back to default values when selecting another store/route	
SPOT	Coupons	New Feature	<b><i>Click-to-redeem support for emailing rewards</i></b>  Added a setting to use Click-to-Redeem functionality when reward coupons are emailed by SPOT. When enabled, the coupon will not be created at the time of email. Instead, a link will be present in the email. If the customer clicks the link the coupon will then be created and applied to the next detail session automatically.	Store Settings > Customer Rewards Settings > Use Click-to-Redeem for Email Awards  All of these tokens will be substituted with a Click-to-Redeem URL when the setting is enabled: @REWARDBARCODE, @REWARD2DBARCODE, @COUPONURL
SPOT	Customer View	Addition to Existing Feature	<b><i>Customer View - show that the customer initiated Twilio STOP (per mobile phone)</i></b>  If the customer has replied with STOP to an SMS sent by SPOT, the General Tab of Customer View as well as the More Phones view will say "(Disabled)" in red next to the phone number.	
SPOT	Email	Addition to Existing Feature	Campaign viewer will now display campaigns that as of yet have no messages (regardless of date range), unless the campaign is marked inactive.	
SPOT	Gift Cards	Fix	Configuration problem of adding a tender type of Gift Card and not setting a Gift Card Profile in Program Configuration>Store>Site Settings>Gift Card Settings is no longer allowed.	Program Configuration>Store>Site Settings>Gift Card Settings>Gift Card Profile is required for tender type "Gift Card".
SPOT	HSL	Fix	HSL/Edit Definitions - Change ID/Key now allows alpha characters.	Menu>HSL (Heat Seal Labels)>View/Edit Definitions>Change ID/Key

SPOT	Order View	Fix	When viewing an archived invoice, the redo and reassign customer buttons are now disabled.	
SPOT	Process Steps	Fix	Fixed a problem where a workflow step's status override settings did not work when fast racking was enabled.	
SPOT	Reports	Addition to Existing Feature	<p><b>Add reassignable bags to bag scan reports</b></p> <p>Reassignable bags are now included in the Bag Scans by Customer and Date report, Bag Scans by Route by Day (Detail) report, Bag Scans by Route by Day (Summary) report and Bag Scans Not Detailed report.</p>	Reports>Reports Gallery>Routes> Bag Scans by Customer and Date, Bag Scans by Route by Day (Detail), Bag Scans by Route by Day (Summary) and Bag Scans Not Detailed.
SPOT	Routes	Fix	When setting a manual route start or stop address SPOT will now use the correct list of locality abbreviations (US states, Canadian provinces, etc) based on SPOT locality settings.	
SPOT	SMS	Fix	Fixed a problem where null characters in incoming SMS messages prevented the SMS Replies alert from displaying.	
API	General	Fix	Fixed - API - New customer signup is not using the store setting that sets up the default for "disable minimum order surcharge"	
CustomerConnect 3.x	General	Fix	Fixed - CustomerConnect (v3) signup link will now correctly redirect to the simplified signup according to the setting
