

## Release Notes for 7.0.13058

App	Feature	Type	Comments	Settings/Required Changes
SPOT	Activity Log	Fix	The "SMS - Validate Phone Numbers" function was not including the correct customers when service plans were selected in the filtering screen.	
SPOT	Credit Cards	Fix	Writing a payment exception off caused OTS to consider the write-off date as the declined date and send a declined card notification.	
SPOT	Menu	Fix	Performing a redo on an invoice that has been assigned to SPOT.Locker causes the redo to have an invalid locker assignment.	
SPOT	Menu	Fix	The "Lockers Assign/Clear" screen was not loading if the selected locker group had large locker numbers defined.	
SPOT	Merchandise	Fix	Returns of non-subscription merchandise items were not being allowed because they were mistakenly being treated as a subscription cancellation.	
SPOT	Printing	Fix	Invoice node for processing cost was not applying the full upcharge quantity in its calculation.	
SPOT	Reports	Fix	Route Stop Profitability - Outgoing Report now shows route v2 from delivery console as the Incoming report does.	
SPOT	SMS	Addition to Existing Feature	A "Content" column has been added to the "On My Way" tab in the Notification Center, which shows the content of the SMS received from the customer.	
Data Exports	General	Addition to Existing Feature	"SubscriptionCouponTotal" and "SubscriptionCouponTotalDelta" fields have been added to Data Export Service A.	
SPOT	Conveyor	Fix	Fixed route offload to not consider Customer Specific Route Rules if the route is a service plan, even if the setting is set (as these don't apply to service plans).	Store settings > Conveyor Settings > Offload Uses Customer Specific Route Rules
SPOT	Coupons	Addition to Existing Feature	SPOT now allows a customer to be upgraded to a more expensive subscription plan before the current plan expires.	

SPOT	Email	Addition to Existing Feature	SPOT now has the ability to send an email automatically when a subscription plan is activated.	Company Settings > Subscription Settings > Subscription Plans > (Subscription Plan) > Plan Levels > (Plan Level) > Activation Email Template
SPOT	General	Change	The character count at the bottom of the "Edit Document Templates" screen will now turn red when an edited SMS template exceeds 160 characters, indicating that the template will require multiple messages to send.	
SPOT	General	Change	Auto-renewed subscription plans now show on department-based sales reports in the "Subscription Plans" department group in order to be distinguished from regular merchandise sales.	
SPOT	Markin	Fix	Price at Mark-in alterations are not getting the specified price in the Denmark locality.	
SPOT	Markin	Change	Quick, Detail, Order Pickup, Quote and Merchandise functions are now disallowed customers with a status of "Sign Up".	
SPOT	Reports	Change	Route Customer Delivery Settings now supports Delivery Console route pickup/delivery types.	
SPOT	Reports	Change	Added Service Plan awareness to the Cash Received report, previously considering those entries as 'counter'.	
SPOT	Reports	Fix	FIXED - Under certain circumstances, the "Tax Picked Up Summary" report was improperly reporting the Gross Sales.	
SPOT	Reports	Addition to Existing Feature	The "Incoming Summary - Subscription Coupons" report has been added to the "Incoming Summary" report group in Reports Gallery > Sales folder.	
SPOT	Reports Queue	Fix	Users in time zones ahead of US MDT would experience hours of delay before a recently created/edited scheduled task was run.	
Conveyor Kiosk	General	Addition to Existing Feature	The workstation level Delivery Rail Number setting can now be a list of semicolon separated numbers. The first number in the list will be the default, but the clerk can pick another. For example:  2;3;4  Default will be 2, but the clerk can also choose to deliver to 3 or 4	Workstation Settings > Conveyor Settings > Delivery Rail Number
