Release Notes for Version 7.0.5319

App	Feature	Type	Comments	Settings/Required Changes
SPOT	Adjustments	Addition to Existing Feature	***As a SPOT user, I would like taxability configured for merchandise adjustments separately from manual adjustments*** Add separate settings for whether discounts on merchandise orders affect tax calculation. Previously these were controlled by the manual adjustment settings.	Store Settings > Invoice Settings > Merchandise Discounts Taxable and Merchandise Discounts Taxable at Secondary Rate
SPOT	AR	New Feature	***As a SPOT user, I would like the ability to lock orders prepaid on account so that they cannot be modified.*** The ability to lock invoices from any changes if they have been prepaid with a specific tender type has been added to SPOT.	Company Settings > Invoice Settings > Tender Types > (Tender Type) > Lock Invoices If Used for Prepay
SPOT	Assisted Assembly	Fix	Assisted Assembly - Fixed issue, where if you Close, then cancel the action, the controls across the bottom remain disabled.	
SPOT	Cash Control	Fix	The Drawer Checkin screen was not able to display all coin types if the locality has more than 6 coin types defined.	
SPOT	Conveyor	Change	***As a SPOT conveyor user I would like the conveyor context cleaned up*** Removed the "Folding" option from the Conveyor Context setting on items in price tables. This is a legacy setting that has for a long time had the exact same effect as "Not a Conveyor Item", which is the setting that should be used in the future. Please note that this is entirely unrelated to conveyor specialty arm settings which may be used for items intended to be folded as well as many other special situations. There will be no change in specialty arm behavior.	Program Configuration > Mark-In Settings > Price Tables > Departments > Categories > Items > Conveyor Context
SPOT	Credit Cards	Fix	Fixed - TSYS Transit voids not functioning correctly.	
SPOT	Credit Cards	Fix	Fixed - NZ CC hanging, added the ability to specify both URLs for POS and TOKEN processing.	There are two URL specifications required for PaymentExpress processing. Both may now be added to the CC Profile URL field, separated by a ';'. The default would normally be seen as "https://sec.paymentexpress.com/pxmi3/pos.aspx;https://sec.paymentexpress.com/pxpost.aspx". The first URL is *always* going to be used for terminal processing, the second for tokens. If a token is attempted with only one URL, the system will throw back an error re "missing URL".

					If this setting is NOT specified, the system will use the defaults as shown here.
SPOT		Customer View	Fix	Removing the rewards program from a customer was also removing the customer's email address.	
SPOT		Email	Fix	Coupon/Visit amount on campaign details will now correctly show the value for that customer.	
SPOT		Enterprise Config	Change	**As an Enterprise Config user, I would like the report selector to use the reporting root based on membership.** The enterprise group selection screen for reporting will now apply the reporting route associated with the user or group, if one is defined.	
SPOT		General	Addition to Existing Feature	**As a SPOT user, I would like to use the "CK" slot on the visual invoice as a Direct-Debit indicator.** A "DD" flag has been added to the Visual Invoice to indicate direct debit (ACH) information on file.	
SPOT		Home Page	Addition to Existing Feature	**As a SPOT Technician, I would like the 'About' screen to provide the dashboard web site information.** (HOSTED ONLY) - Show Dashboard web site address on Help->About screen.	
SPOT		Home Page	Change	Show SPOT version on title bar, hide environment name.	
SPOT		HSL	Change	**As a SPOT user, I would like a prompt to inform me that a HSL attribute has been changed/renamed when applicable.** HSL scans that don't correctly map to a table (Dept./Cat/Item, Modifier, etc.) will now provide a more explicit failure message to the user.	
SPOT		Issue Manager	Fix	Corrected an error message in Issue Manager that directed the user to settings that do not exist.	
SPOT		Markin	Fix	Fixed - Invoice Adjustments, with "Applies To" = "Invoice", would still apply to invoices following a manual split during "Detail".	
SPOT		Markin	Fix	Fixed - Invoice-level adjustments that affect the promised date will no longer affect the promised date of the next invoice, when split from 'Detail'.	
SPOT		Markin	Fix	Manual split during touch-screen mark-in was not clearing the item count selection in certain cases.	
SPOT		Markin	Fix	Fixed a problem where SPOT would prompt for an extra,	

			unused HSL.	
SPOT	Markin	Addition to Existing Feature	**As a SPOT user, I would like auto-coupons to prompt to remove discount group if 'Coupon Overrides Discount' option is enabled.** Added "Coupon Overrides Discount (Prompt)" to Store Settings->Mark-in Settings->Allow Coupon With Discount/Promotion. This setting works with Auto-Coupons and gives the user the choice of using the coupons or applying the discount.	Added "Coupon Overrides Discount (Prompt)" to Store Settings->Mark-in Settings->Allow Coupon With Discount/Promotion.
SPOT	Merchandise	Addition to Existing Feature	**As a rewards user, I would like a % discount for merchandise sales.** Added "Merchandise %" to Customer Rewards profiles.	Company Settings->Customer Rewards Settings->Merchandise Discount %
SPOT	Printing	Addition to Existing Feature	**As a SPOT User, I would like a %STORE token for disclaimers.** Added a %STORE token to Item Disclaimers which is replaced with the Store Name (to supplement the existing %COMPANY token).	Company > Mark-in Settings > Item Disclaimers
SPOT	Rack	Fix	Fixed an error that happens when attempting to unrack an order while fast racking is enabled.	
SPOT	Reports	Addition to Existing Feature	ADDED - "HSL Cross-Customer Report" to the Customer section of the reports gallery. This report will display any heat seal scanned for the given customer that has also been scanned to orders for other customers.	
SPOT	Reports	Fix	Fixed problem with HSL Labels Created by Date report not showing modifiers.	
SPOT	Reports	New Feature	**As a SPOT user I would like CCOF Customers to show all cards for each customer** Added Reports Gallery > Credit Cards > All Cards on File. This displays partial card details for enabled customers with cards on file, including secondary cards on file.	
SPOT	Reports	Fix	Fixed - Daily Production Reports - Production Minutes is corrected.	
SPOT	Reports	Fix	Fixed - Standard Daily Production Report, hourly counts are corrected.	
SPOT	Reports	New Feature	**As a SPOT user, I would like an Assisted Assembly Orders Assembled Report** ADDED - "Orders Assembled" report to the Production section of the Reports Gallery. This report is identical to the	

			"Conveyor - Orders Assembled" report but is instead filtered by store instead of conveyor(s).	
SPOT	Reports	Change	***As a SPOT user, I would like the Time Clock By Labor Category to prompt for pay period and calculate overtime hours the same as the Time Clock Summary Report*** Changed Time Clock By Labor Category reports to use the same underlying queries as the Time Clock Employee reports. This fixes a problem where the former was not respecting the Overtime Cutoff - Day setting, and adds the ability to select a pay period instead of a manually specified date range.	
SPOT	Reports	Addition to Existing Feature	***As a SPOT user, I would like a 'Piece Count By Department By Period Comparison Report'*** A "Pieces By Department By Period" report has been added to the Sales folder of Reports Gallery.	
SPOT	Reports	Fix	Change Non Restorable report to support "Non-Salvageable" and "Non Salvageable" departments in accordance with the button labels in the SPOT Menu.	
SPOT	Rewards	Addition to Existing Feature	The amount to be saved with signup has been added to the rewards club signup prompt	
SPOT	Rewards	Addition to Existing Feature	***As a SPOT user, I would like to require mailing address info for certain rewards programs.*** The ability to require phone and/or mailing address for a rewards club membership has been added to SPOT.	Rewards Profile > Phone and/or Address
SPOT	Rewards	Fix	SPOT attempted to enforce the required modifiers of the last marked-in item when a rewards club signup/renewal item was added.	
SPOT	Rewards	Change	***As a SPOT user, I would like to remove a customer from a rewards program if the membership item is voided.*** SPOT will now remove the customer's rewards program if a signup or renewal item is voided in an open ticket.	
SPOT	Search	Addition to Existing Feature	***As a SPOT User, I would like an option to default Garment Search to Show All Orders*** Garment search can now be set to default to All Orders instead of In Process Only.	Setup > Program Configuration > Store Settings > Search/Lookup Settings > Default Garment Search to All Orders.
SPOT	Security	Addition to Existing Feature	Added "View Production Summary" Activity Right and activity log entry.	Activity Rights->Production->View Production Summary
SPOT	Security	Addition to Existing	Added "Access HSL Remap Utility" Activity Right and activity log entry.	Activity Rights->Utilities->Access HSL Remap Utility.

		Feature		
SPOT	Tags	Fix	Fixed - Issue with lots getting incremented twice under certain conditions.	
SPOT	Uncategorized	Change	***As a SPOT user, I would like all 'Inactive' customer references to be changed to 'Disabled' to eliminate confusion with the inactive customer report metrics.*** Updated Help > About to properly refer to customers set as "Disabled" instead of "Inactive". Likewise modified several reports: Active Customers -> All Enabled Customers Active Customers with Orders > All Enabled Customers with Orders Customers Set Inactive -> Customers Set Disabled Customer Set Inactive - Audit -> Customer Set Disabled - Audit	
Conveyor Kiosk	General	Fix	Fixed - Kiosk to disallow card swipes/scans except at the welcome view.	
CustomerConnect	General	Change	Fixed click not registering if the click was not performed on the text.	
CustomerConnect	General	Change	Added support for New Zealand and Australia.	
CustomerConnect	General	Change	Template directory is no longer case sensitive through the gateway.	
CustomerConnect	General	Change	Email address validation is now less restrictive and should allow almost any email address format.	
CustomerConnect	General	Fix	Discounts and Coupons will now correctly show when viewing a single order.	
CustomerConnect	General	Change	Changed suspension default message from 'Your suspension scheduled has been from DATE to DATE' to 'Your temporary suspension of service has been scheduled from DATE to DATE'.	
CustomerConnect	General	Addition to Existing Feature	***As a CustomerConnect user, I would like to be able to unsubscribe to notifications without logging in.*** Added an unsubscribe page to CustomerConnect as well as added new API functions to support retrieving basic info and updating notifications based on customer unique id.	https://account.mydrycleaner.com/(CompanyAccount)#/notifications?Id=(CustomerGUID)
CustomerConnect	General	Change	***As a Customer Connect API user, I would like option(s) to hide/remove preferences.*** Only preferences marked with "Display On Web" will be shown.	Company > Mark-in Settings > Preferences > (Preference) > Display On Web

CustomerConnect	General	Addition to Existing Feature	**As a SPOT CustomerConnect user, I would like an email notification when a new web request occurs.** Added "Send Manager Email" that will send a copy of the transaction email to the manager email specified in settings.	
CustomerConnect Legacy	General	Fix	Notification selections are no longer showing blank values.	
Email Services	General	Change	**As a SPOT user, I would like the email template editor not to include empty space after a carriage return.** The new HTML template editor was including extra blank space after a carriage return.	
OTS	General	Fix	One and Done will now correctly exclude customers with multiple visits.	
OTS	General	Fix	Fixed an error that was occurring when trying to import a contact list.	
OTS	General	Fix	Fixed a processing error that was occurring with the ContactGroup campaign.	
OTS	General	New Feature	**OTS / Spot – As a marketing user I would like to be able to assign a picture to a route and have email tokens available to include them in an email or letter.** Added the ability to import a driver image into Store Settings > Route Settings > Drivers > Driver Image. Corresponding OTS token of @ROUTEDRIVERPICTURE. Optionally you can specify the width of the image with the token to have the picture resize at generation while maintaining aspect ratio. For example: @ROUTEDRIVERPICTURE256.	Store Settings > Route Settings > Drivers > Driver Image
OTS	General	New Feature	**As an OTS user, I would like a store manager picture token** Added the ability to import a store contact image into Location Information > Store > Contact Picture. Corresponding OTS token of @STORECONTACTPICTURE. Optionally you can specify the width of the image with the token to have the picture resize at generation while maintaining aspect ratio. For example: @STORECONTACTPICTURE256.	Location Information > Store > Contact Picture
OTS	General	Fix	Printed PDFs now support generating a QR barcode.	
Route Mobile Client	General	Fix	Fixed RTM - Issue where the "Show Additional Stops" was resetting to zero.	
SPOT API	General	Change	Added a check on GetInvoicesList to make sure the start date is within a valid date range (1/1/1753 to 12/31/9999).	
SPOT API	General	Change	Email tokens for store information will now correctly be pulled from the physical address type from Location Information.	

SPOT API	General	Addition to Existing Feature	Added new tokens for Pickup email: {{PickupTimeRange}} and {{DeliveryTimeRange}}.	
SPOT API	General	Change	Added new function "GetRecommendedRoute" which will return a route based on the provided Lat/Long coordinates. Changed "ConvertToDelivery" so that existing route customers will move to the new route.	
SPOT API	General	Fix	Franchise credentials will now correctly work through the gateway.	
SPOT API	General	Change	The pickup request will now use the route address if exists, if not uses primary address.	
SPOT API	General	Change	ConvertToDelivery function now accepts the parameter "accountNodeID". This is the store that the route belongs to. If this is not provided, it will use the store that the provided route belongs to. If neither the route id or account node id are provided, it will use the "Default Route Name" and "Default Store Id" settings from the profile.

Added a CRM entry when converting to a route customer or when changing routes. | |
| SPOT API | General | Addition to Existing Feature | **_As a SPOT API user, I would like to include the Mnemonic to GetStoreList_**
Added Mnemonic to GetStoreList API call. | |
SPOT API	General	Fix	CustomerConenctJS - Fixed an issue with how the ConvertToDelivery function passes the RouteID.	
SPOT API	General	Fix	Added "DiscountTotal" to RetrieveInvoice function.	
SPOT API	General	Change	NotifyPickup - The parameter for the store now correctly looks for "StoreID". Fixed an error that was occurring during the check to make sure the request is not a duplicate. TimeRequested is now an optional parameter. If it is not provided, it will use the account's date and time.	
SPOT API	General	Change	GiftCardBalance - If the gift card number fails decryption, in order to verify the card number to get the right card balance, then a failure result will now be returned.	
SPOT API	General	Fix	Fixed a function definition that caused IE to throw an error.	
SPOT API	General	Fix	Fixed an issue where the API was not considering DST when determining the current time for the account.	
SPOT API	General	Change	GetDeliveryZones will now only return the routes for the associated brand.	
SPOT API	General	Addition to Existing	**_As a mobile developer, I would like an API function to check for an existing email address._**	

		Feature	Added "CheckEmail" function that will return if the email address exists in the database or not.	
SPOT API	General	Change	Pickup Postback and GET action RoutePostback now properly validate that the pickup date is valid and is not in the past.	
SPOTPing	General	Fix	Fixed a crash when trying to manually email a log file with no log file selected.
