

## Release Notes for Version 7.0.6774

App	Feature	Type	Comments	Settings/Required Changes
SPOT	Activity Log	Addition to Existing Feature	<b>As a SPOT user, I would like 'Activity Log' to record when a timeclock entry is removed with 'Manage Timeclock Entries'</b> There will now be an Activity Log entry when a Time Clock entry is removed using Manage Timeclock Entries	
SPOT	AR	Fix	Fix possible crash when viewing hotel statements.	
SPOT	Assisted Assembly	Fix	Assisted Assembly - Remaining Pieces caption now matches the search (caption was understated).	
SPOT	Assisted Assembly	New Feature	Assisted Assembly - Added a button to show missing pieces for the current order (as highlighted in the view), current customer, or all missing pieces for all orders in the current assembly session. Option to print the list to the invoice printer (a pick-list of missing items) is supported.	
SPOT	Assisted Assembly	New Feature	Assisted Assembly - Revised screen to show 'x of y' with color association for first, middle, and final invoice, as the invoices are completed. Note the 'y' is a moving target, as orders may be voided, manually split elsewhere, etc. Generally, however, the 'y' will be correctly calculated according to piece counts, order counts, and split quantities.	New print node in the invoice template, AssemblyOrders.
SPOT	Configuration	New Feature	<b>As a SPOT user, I would like to import an excel spreadsheet of merchandise items for setup</b> Merchandise items can now be imported from or exported to an Excel spreadsheet.	Company > Merchandise Settings > Merchandise Item Setup > Import/Export Stand-alone SPOT users must have Excel installed on the local PC where the import or export is attempted.
SPOT	Conveyor	Fix	Changing item details (eg, price) or promised date will now resend the information to conveyors.	
SPOT	Coupons	Fix	Fixed the "Upcharges Only" setting for Type 1 and Type 2 coupons.	
SPOT	Credit Cards	Fix	SPOT will not allow a workstation to perform the CCOF/ACH Payments function if the store's credit card processor is TSYS and the required workstation settings are missing.	
SPOT	Customer View	Fix	In Customer View, only the first 50 characters of the pickup and delivery instructions added in a mobile device were being displayed.	
SPOT	Customer View	Fix	Customer View did not save route pickup/delivery instructions if they exceeded 50 characters.	
SPOT	Customer View	Fix	UK postal codes with a length of 7 were not showing up in SPOT properly when a signup is done via CustomerConnect.	
SPOT	Customer View	Fix	The Messages tabs in Customer View and in the Notification Center were chopping off some of the content of longer messages on the right side of the screen.	
SPOT	Customer View	Fix	Fix message when saving a new customer that indicated there is a duplicate email address when in fact it is a duplicate phone number.	
SPOT	Customer View	Fix	Customers who signed up in CustomerConnect and who had a route explicitly assigned in the Route tab of Customer View when	

			processing Web Requests were sometimes showing up twice in Customer Lookup because of multiple route assignments.	
SPOT	General	Fix	Fixed error saving a redo when the redo reason is longer than 43 characters.	
SPOT	General	Fix	Clicking the Save button in the Messages tab of the Notification Center was erroneously acknowledging all unacknowledged messages	
SPOT	General	Fix	It was possible to send a quick SMS to the wrong person in the Messages tab of the Notification Center.	
SPOT	General	Fix	When changing a customer rewards profile, SPOT will now warn if there appears to be a problem with the selected Customer Rewards profile instead of crashing.	
SPOT	General	Fix	Fixed collections in Program Configuration to prevent users from accidentally giving the items names that exceed the size of the underlying database column.	
SPOT	General	New Feature	<b>As a SPOT User I would like a report of customers grouped by AR Payment Precedence</b> Added a report: Reports Gallery > A/R > AR Customers by Payment Precedence	
SPOT	General	Fix	Fixed problems with saving settings for a store other than the currently logged in store. This also fixes the per-hotel custom statement file setting.	
SPOT	General	Fix	Fix a problem where old HSLs with leading or trailing spaces in the Price Table name cannot be remapped by the remap utility after the price table itself has had the name fixed.	
SPOT	General	Fix	Changed the display name of setting 'Allow Price Modify on Mark-In' in Company > Mark-in Settings to 'Allow Item Price Modify' to better reflect its actual meaning. This setting controls the ability to change price in item view as well as at mark-in.	Company > Mark-in Settings > Allow Item Price Modify
SPOT	General	Change	<b>As a SPOT User I want to prevent purchasing gift cards with cash credit</b> Added settings to control what tender types can be used to sell gift cards.	Store > Gift Card Settings > Tender Types Disallowed Store > Gift Card Settings > Disallow Cash Credit Purchase
SPOT	Gift Cards	Addition to Existing Feature	<b>As a SPOT gift card user, I would like an "UpdatedBalance" column added to the (new) gift card spreadsheet import</b> Added UpdatedBalance column to Gift Card import. This allows for either activating a new card to match the UpdatedBalance amount or "topping up" an existing card to match the UpdatedBalance amount.  NOTE - the UpdatedBalance column, if specified, overrides the Amount column. Only use the UpdatedBalance option if you intend to top up existing cards; otherwise, continue to use the Amount column.	
SPOT	Home Page	Fix	Upon opening the Notification Center, occasionally a message would display indicating that a customer did not have a valid phone configured to receive SMS.	

SPOT	Home Page	Addition to Existing Feature	A "[Locker]" tag for locker customers has been added to the customer type column in the Signups tab of the Notification Center.	
SPOT	Markin	Fix	Fix F9 hotkey in Touchscreen Extended markin mode to change promised date for the entire order, as stated in the button label, not just the current item.	
SPOT	Notification Center	Fix	Existing messages don't show on the Messages tab of the Notification Center if a narrow date range is chosen.	
SPOT	Order View	Change	<b>As a SPOT user, I would like the reprint receipt option to provide an option to cancel</b> Added a confirmation dialog to Reprint Receipt, except when Workstation Settings > Cashier Settings > Send Email Receipt If Available is set to Prompt.	
SPOT	Pricing	Fix	Fixed-amount adjustments that apply to "Invoice" were fluctuating in value from one pricing event to another.	
SPOT	Production	Fix	Fix production commitment itemized view so that the invoice number rows display invoice status rather than an item's production status	
SPOT	Reports	Fix	Fixed a loophole that would allow making changes to a written-off invoice.	
SPOT	Reports	Fix	Fixed display problems with the PPOH by Department Group and PPOH Summary by Labor Category reports.	
SPOT	Routes	Fix	Fixed Store > Route Settings > Use Customer Specific Route Setup. (The setting was only partially implemented).	Fixed Store > Route Settings > Use Customer Specific Route Setup
SPOT	Routes	Addition to Existing Feature	<b>As a SPOT user, I would like the route recon to sort invoices by location.</b> Added an option to sort route reconciliation by invoice rack location instead of stop number.	Store > Route Settings > Routes > [Route Name] > Sort Reconciliation By
SPOT	Routes	New Feature	<b>As a SPOT User, I would like to auto-charge a once-a-month delivery fee for route customers upon first monthly use.</b> Add option to allow a monthly route service charge on the first order for a route customer.	Store Settings->Route Settings->(Route)->Allow Monthly Service Charge? Store Settings->Route Settings->(Route)->Monthly Service Charge Name Store Settings->Route Settings->(Route)->Monthly Service Charge Amount
SPOT	Routes	Fix	Fix issue with route instructions not showing up on manifest when customer specific route rules are disabled, both in API and on SPOT manifest printout. ALL instructions will now show up on the manifest if entered, regardless of 'Use Route Rules' status, or visit type.	Both current branches are updated.
SPOT	Tags	Fix	Fixed a problem where tag tokens that substitute data containing a \ or a " would make the tag fail to print on Zebra printers.	
SPOT	Tags	Fix	The @ROUTE token in tags is now based off the invoice, not the customer. This will fix cases where a counter order for a customer that is assigned to a route incorrectly has tags printed with a route name.	
Mobile\MDC Mobile Client	General	Fix	GetPreferences only includes the preferences selected with "Display On Web".	

Mobile\MDC Mobile Client	General	Change	Add Hours of Operation logic to 'On My Way' requests	
Mobile\MDC Mobile Client	General	Change	Add support for GetLocalitySettings API	
Mobile\MDC Mobile Client	General	Fix	Increase gift card length to allow more digits	
Mobile\MDC Mobile Client	General	Addition to Existing Feature	<b>As a MDC Mobile user, I would like a multiple use coupon that can be redeemed again after use.</b> Coupons can now be defined in SPOT that are "multiple use", and will show up in the mobile app or in CustomerConnect until they are redeemed. After they are redeemed, they will not show up in the mobile app or in CustomerConnect until they have been applied to orders and the orders have been picked up. Once the orders using the coupons have been picked up, the coupons will again show up in the mobile app and in CustomerConnect.	Company Settings > Mark-in Settings > Coupons > (Coupon) > Display on Web Company Settings > Mark-in Settings > Coupons > (Coupon) > Web Coupon Type Company Settings > Mark-in Settings > Coupons > (Coupon) > Web Coupon HTML Company Settings > Mark-in Settings > Coupons > (Coupon) > Web Coupon Image
Mobile\MDC Mobile Client	General	Addition to Existing Feature	<b>As a MDC Mobile user, I would like to list a single use coupon that disappears when used.</b> Coupons can now be defined in SPOT that are "single use", and will show up in the mobile app or in CustomerConnect until they are redeemed. After they are redeemed, they will never again show up in the mobile app or in CustomerConnect.	Company Settings > Mark-in Settings > Coupons > (Coupon) > Display on Web Company Settings > Mark-in Settings > Coupons > (Coupon) > Web Coupon Type Company Settings > Mark-in Settings > Coupons > (Coupon) > Web Coupon HTML Company Settings > Mark-in Settings > Coupons > (Coupon) > Web Coupon Image
Mobile\MDC Mobile Client	General	Change	Display alterations and upcharges on visual invoice.	
Mobile\MDC Mobile Client	General	Change	Add option to hide prices on visual invoice Settings.Views.Orders.PriceHidden (default value is 'False')	
Mobile\MDC Mobile Client	General	Fix	Add option to hide prices on visual invoice Settings.Views.Orders.PriceHidden (default value is 'False')	
Mobile\MDC Mobile Client	General	Addition to Existing Feature	<b>As an MDC Mobile user, I would like to hide prices on 'My Orders' screen</b> Add option to hide prices on visual invoice Settings.Views.Orders.PriceHidden (default value is 'False')	
Mobile\MDC Mobile Client	General	Addition to Existing Feature	<b>As a MDC Mobile Client user, I would like an option to hide the reward balance.</b> Option to hide the reward balance for customers who do not use rewards programs	MDC->Profile->Hide Reward Balance
Mobile\MDC Mobile Client	General	Addition to Existing Feature	<b>As an MDC Mobile user, I would like to disable the welcome screen (or limit the number of custom pages)</b> Added setting to allow max page count on introduction banner rotation.	MDC->Settings->Welcome->Rotation Image Count
Mobile\MDC Mobile Client	General	Fix	Fix input fields validators. Add ViewSettingsGeneralValidationErrorMessage to settings	
Mobile\MDC Mobile Client	General	Fix	<b>As a MDC mobile user, I would like missing sign-up fields to be more concise and simplified</b> Fix input fields validators. Add ValidationErrorMessage node to general settings	
Mobile\MDC Mobile Client	General	Fix	Remove 'Open' column from Store Hours screen	
Mobile\MDC Mobile Client\Help	General	Change	Store hours need to use the hours of operation grid if available	
RouteTrac	General	Change	Add button "Sync Status" to stats screen	

RouteTrac	General	Fix	Fixed flag for on demand requested customers (Driver screen)	
RouteTrac	General	Change	Add support for GetLocalitySettings API	
RouteTrac	General	Fix	Fix error "Bags: Object reference not set to an instance of an object."	
RouteTrac	General	Fix	Replace the temporary "Arrow" shown below with the old arrow	
RouteTrac\RouteTrac Client	General	Change	Remove CRM button from onsite screen	
RouteTrac\RouteTrac Client	General	Fix	Add auto scroll to bottom of messages	
RouteTrac\RouteTrac Client	General	Fix	Completed stop to return to next record	
RouteTrac\RouteTrac Client	General	New Feature	Add gear and service URL options	
SPOT API	General	Fix	Fixed a problem where CustomerConnect/API settings changes do not become effective in a timely fashion.	
SPOT API	General	New Feature	Added new "GetLocalitySettings" to API Q" & "T" channels	
SPOT API	General	Change	The API documentation for Customer API functions has been updated.	
SPOT API	General	Change	Added ValidateCaptcha & ValidateToken to the API documentation 'User' page (redirected from Getting Started update).	These were originally intended to be placed on the "Getting Started" page. Decided to leave this page alone and place these updates on the "User" page.
SPOT API	General	New Feature	Added GetCouponImage to SPOT API	
SPOT API	General	Change	Updated API documentation for the AR view	
SPOT API	General	Change	Updated API documentation for the Settings view
