

Release Notes for Version 7.0.6866

App	Feature	Type	Comments	Settings/Required Changes
SPOT	AR	Addition to Existing Feature	<i>As a SPOT User I would like a setting to prevent A/R payments from triggering Send Email Receipts At Posting</i> New setting: Store > Route Settings > No Email for Orders Paid to A/R. If enabled, emails will not be sent for orders posted to A/R even if Store > Route Settings > Send Email Receipts At Posting is selected.	Store > Route Settings > No Email for Orders Paid to A/R Store > Route Settings > Send Email Receipts At Posting
SPOT	AR	Fix	Fixed statement generation so that the full 50 characters of a business customer's Contact field can be passed to the statement report layout. Previously only 30 of the 50 possible characters were used.	The statement report file may impose its own limitations on how much of the Contact field displays.
SPOT	Assisted Assembly	Fix	Added setting activate Assisted Assembly "x of y" feature (new setting is in the Assisted Assembly Profile). The options are "Disabled", "Enabled - Hidden", "Enabled - Visible".	
SPOT	Cash Control	Fix	Corrected activity rights check for reprinting Z reports. Now, the user must have the Reprint Z-Report right and not have Hide Checkout Totals.	
SPOT	Conveyor	Fix	Fixed a problem with updating data for Quicksort conveyors after a manual split is requested by the conveyor software.	
SPOT	Customer Connect	Fix	CustomerConnect - Default email subject "Welcome" for "Signup" no longer includes a trailing space.	
SPOT	General	Addition to Existing Feature	Order Ready emails and SMS sent from SPOT Scheduler Service will now show in the Messages tab of the Notification Center and Customer View.	
SPOT	HSL	Fix	From Detail, disallow multi-piece items to create HSL. This will prevent items from being lost during detail, if item view is invoked and HSL created from there. Single piece items will still allow HSL creation from this interface.	
SPOT	Localities	Addition to Existing Feature	<i>As a SPOT user in Luxembourg, I would like the Luxembourg locality added to SPOT</i> Luxembourg has been added as a SPOT locality.	
SPOT	Order View	Fix	Fixed a problem with displaying archived invoices.	
SPOT	Pickup	Fix	Fix - Order Pickup, after processing a partial payment, the view will return to the same state as before - this means all selected actions Pickup/PNP/etc will remain intact.	
SPOT	Pickup	Fix	Fixed - Order Pickup, scenario wherein if order view is pressed too quickly after a tender type is accepted, the system can generate an error.	
SPOT	Pickup	New Feature	<i>As a SPOT user, I would like an automated email/SMS to send to the customer when a PNP is performed</i> New settings have been added to support sending an email or SMS message to customers after a Pickup Not Paid pickup, to remind them that the	Store > Cashier Settings > Send PNP Message to Customer Store > Email Settings > Pickup Not Paid Message Store > SMS Settings >

			order(s) still have a balance due. This will also insert a CRM entry documenting that the message was sent.	<p>The email is controlled by the "Counter Order Sold" notification type. The SMS is controlled by the "Batch SMS" notification type.</p> <p>The usual customer information message tokens are supported, plus these two:</p> <p>@PNPORDERS - Comma separated list of the orders that were picked up without payment @PNPBALANCE - Unpaid amount for all these orders</p>
SPOT	Reports	Fix	Fixed the calculation of the values in the summary rows of PPOH reports.	
SPOT	Reports	Fix	FIXED - The "Top 100 Customers - Brands" was running extremely slowly.	
SPOT	Reports	Addition to Existing Feature	ADDED - Gift Card Audit Trail report to Gift Card section of Reports gallery. This report will list the full audit trail of all gift cards in the system as of the specified date.	
SPOT	Reports	New Feature	ADDED - Gift Card Liability Report to Gift Card section of Reports Gallery. Displays current balance of all Gift Cards in SPOT. Only works with SPOT internal Gift Cards.	
SPOT	Reports	Fix	PPOH by Labor Category reports will now omit categories if both the piece count and time are zero. This modifies a previous change which omitted them if the piece count was zero regardless of the time.	
SPOT	Reports	Addition to Existing Feature	<p><i>As an MDC mobile user, I would like a report on all the feedback received in the app</i></p> <p>Added a Customer Feedback report to Reports Gallery > Customer. This will report on feedback submitted via the mobile app, CustomerConnect, or through the SPOT API.</p>	
SPOT	Reports	Fix	Fixed a possible problem that prevents the report Production > Employee Production from displaying.	
SPOT	Reports	New Feature	<p><i>As a SPOT user, I would like a report to see invoices with specific items</i></p> <p>"Summary - Specific Item Detail" report has been added to the Management folder of Reports Gallery</p>	
SPOT	Routes	Fix	Fixed: Route report displayed city from primary address instead of route address.	
SPOT	SMS	Addition to Existing Feature	<p><i>As a SPOT user, I would like to send an SMS message when customer is not present and CCOF declines.</i></p> <p>The ability to automatically send an SMS message when a customer's card is declined in A/R CCOF Payments has been added to SPOT.</p>	<p>Store Settings > A/R Settings > Send SMS on Declined CCOF Payments</p> <p>Store Settings > A/R Settings > SMS Message File for Declined CCOF Payments</p>
SPOT	Splitting	Fix	Existing percentage-based invoice adjustments that apply to "Invoice" were not being created in newly-split invoices.	
CustomerConnect	General	Change	Added SPOT settings for Google reCaptcha.	System Settings > Service Host Settings > reCaptcha Settings > Secret Key

				<p>Sets the host "Secret" key for Google reCaptcha. This provides a default value for all systems, and may be overridden by the corresponding company setting. System Settings > Service Host Settings > reCaptcha Settings > Site Key</p> <p>Sets the client "Site" key for Google reCaptcha. This provides a default value for all systems, and may be overridden by the corresponding company setting.</p> <p>Company Settings > Service Host Settings > reCaptcha Settings > Secret Key</p> <p>Sets the host "Secret" key for Google reCaptcha. This provides a value for the current company, and overrides the corresponding 'System' setting. Company Settings > Service Host Settings > reCaptcha Settings > Site Key</p> <p>Sets the client "Site" key for Google reCaptcha. This provides a value for the current company, and overrides the corresponding 'System' setting.</p> <p>The "Site Key" will be injected at runtime into GetSettings() (CustomerConnect settings (General.reCaptcha.[Site Key])) for all profiles belonging to the system/company. This gives control from any point, preventing the "Secret Key" being available at the client.</p>
CustomerConnect	General	Addition to Existing Feature	<p><i>As a CustomerConnect user, I would like to customize the wording on the referral screen.</i></p> <p>The referral screen wording in CustomerConnect can now be customized.</p>	CustomerConnect Settings > CustomerConnect Profiles > (CustomerConnect Profile) > General > Refer > Message
Mobile\MDC Mobile Client	General	Fix	Fixed - API not returning SOLD (Returned) orders via API.	
Mobile\MDC Mobile Client	General	Change	Hide 'Billing Address' if customer does not have A/R	
Mobile\MDC Mobile Client	General	Change	<p><i>As an MDC Mobile Client user, I would like control over my logo size and/or scaling</i></p> <p>Change image view size for company logo.</p>	
Mobile\MDC Mobile Client	General	Change	Hide the delivery address if the customer is not a route customer	
Mobile\MDC Mobile Client	General	Change	<p><i>As a MDC Mobile user, I would like to optionally disable the Delivery Date section</i></p> <p>Added a "Disable Delivery Options" setting to customer connect settings (visit request settings). This will cause the system to offer pick up options in the MDC app, with delivery schedules to be determined by the store.</p>	
Mobile\MDC Mobile Client	General	Fix	The "On My Way" function in MDC Mobile App is now only showing invoices from the proper retail brand.	

RouteTrac	General	Fix	Fixed a possible divide by zero error in the Route Trac - Route Report	
RouteTrac	General	Change	Change message: Account number is wrong. Please fix the error and try again.	
RouteTrac	General	Fix	Fix RTM closing when click arrow on driver screen	
RouteTrac\RouteTrac Client	General	New Feature	For MDC/CC/API users, SPOT now has the ability to use MDC-style visit requests from the On-Demand Scheduler.	Company Settings > Route Settings > Schedule Route Visits Method (Will Call or Request Visit (API)) System Settings > Service Host Settings > API Gateway/Host URL
RouteTrac\RouteTracMobile - PC	General	Change	RouteTrac Mobile (PC version) Telogis/Geobase (mapping) license updated.	
SOS	General	Fix	Fixed - Orders picked up via SOS will now be limited to their correct (parent) store. Previously, the alert and view in SPOT would incorrectly reflect and process orders for all stores.	
SPOT API	General	Addition to Existing Feature	A "Coupon Description" setting has been added to the CustomerConnect/MDC referral email template.	Company Settings > CustomerConnect Settings > CustomerConnect Profiles > (CustomerConnect Profile) > CustomerConnect Settings > Email > Templates > Referral > Coupon Description
SPOT API	General	Fix	Updated all host- and client-side Captcha keys. Included main + branches 6509, 6692 & 6774.	
SPOT API	General	Change	API - "Q" channel send email functions (w/template) receive a number of new settings. New settings are at CustomerConnect > Email. 1) At the 'Email' level, added settings for "From Address", "From Name", "On Behalf Of Address" & "On Behalf Of Name". These fields will act as first-serve settings, and will be overridden if specified at the template level. Note that Name fields will follow Address fields, IE, if a template "From Address" overrides the Email "From Address", the matching name will follow. 2) Added "From Name", "On Behalf Of Address" & "On Behalf Of Name" settings to each email template type.	
SPOT API	General	Addition to Existing Feature	Support for using the finish URL defined in CustomerConnect settings for referral emails has been added to the API.
