

## Release Notes for Version 7.0.7432

App	Feature	Type	Comments	Settings/Required Changes
SPOT	Assisted Assembly	Fix	AssistedAssembly: Fixed visual invoice to once again show assembled items on orders in green.	
SPOT	Conveyor	Fix	Fixed a problem that could cause conveyor special arm assignment to be fail.	
SPOT	Credit Cards	Change	Added option to notify the user if a tokenized CCOF entry is expired. Normally this is disabled, as most card processors don't expire tokenized card data. However, there is at least one processor that doesn't, and the user needs to know to update the card data.	Company Settings > Credit Card Settings > Enable Token Expiration Notification
SPOT	Credit Cards	New Feature	<b><i>As a SPOT user, I would like a test button on the CC profile configuration to verify if credentials are correct</i></b> Added a new "Test Credit Card Settings" control to workstation settings. Will test selected processors that support external card terminals, submitting a \$1.00 transaction, accepting a card at the terminal, and then processing a VOID to reverse the transaction.	Workstation Settings > Credit Card Settings > Test Credit Card Settings
SPOT	Customer View	Fix	Fixed an error when using secondary locality for a customer with no address specified.	
SPOT	Email	Fix	<b><i>As a SPOT user, I would like the batch email notification setting to be used for batch operation emails as well.</i></b> Invoice Emails sent from Order Search > Batch Operations will now use the Batch Email notification type. A setting has been added to control whether only the first email selected for Batch Email will be used, or all emails.	Store > Search/Lookup Settings > Search-Based Invoice Email Scope
SPOT	General	Addition to Existing Feature	Fixed Customer View > Messages to check the Send Individual Email activity right before allowing a quick email to be sent.	
SPOT	General	Fix	Replace "MDC Cleaners" with company name on "New or Existing" customer screen. Fix bug with birthdate field: if field hidden, the app is still prompting for it during signup when using the "Next" button on the keyboard after entering the last name.	
SPOT	General	Addition to Existing Feature	<b><i>As a SPOT user, I would like a solution to be investigated for changing mnemonics without causing issues with barcodes</i></b> SPOT now has the ability to specify an alternate store mnemonic.	
SPOT	General	Fix	Using API URL from AppDeploy settings (Settings.System.APIURL)	
SPOT	Lot Manager	Fix	Printing from the Lot Manager will now offer the standard Windows printer selection dialog so that a printer can be reliably selected.	
SPOT	Merchandise	Fix	Fixed merchandise inventory manager to allow entering 0 quantity on a stock check.	
SPOT	Reports	Addition to Existing Feature	ADDED - "API - Customer Record Changes" to Web Requests section of the reports gallery. This report will give a historical overview of all customer modifications to accounts through the SPOT API (CustomerConnect WEB, MDC Mobile 3.0 or API interface).	

SPOT	Reports	Addition to Existing Feature	<b>As a SPOT user, I would like the Incoming Summary by Customer Group report to include a Visits column</b> Added a Visits column to Incoming Summary by Customer Group report	
SPOT	Routes	Fix	<b>As a Route Operator I want the Edit Stop button to not reset my location in the stop list</b> Route setup will no longer reset the view to the first stop after using the Edit Stop button.	
SPOT	Search	Fix	Fixed the vast majority of advanced searches to work with emails originated from Batch Operations. Added warnings for the remaining searches that are incompatible (instead of a run-time error or appearing to succeed while not actually sending emails).	
SPOT	Security	Addition to Existing Feature	<b>As a manager/owner I want an activity right to restrict Batch Markin</b> Added "Disable Batch Markin" activity right. If set, it will prevent the user group from using Batch Markin	
SPOT	Security	Change	Setting "Detail Cutoff" to -1 now means to immediately prevent users with the "Disable Invoice Changes After detail" activity right from modifying a detailed invoice. 0 still means the feature is disabled, and any other value is the time to minutes after detail to allow changes.	Company > Invoice Settings > Detail Cutoff
CustomerConnect	General	Addition to Existing Feature	Nigeria has been added to the list of localities in CustomerConnect.	
CustomerConnect	General	New Feature	Providing sign-up customers an choice between regular and on-demand route service	
CustomerConnect	General	New Feature	<b>As an MDC mobile user, I would like an option to provide sign-up customers a choice between regular route service and on-demand route service</b> Added ability to provide sign-up customers a choice between regular route service and on-demand route service.  Also added next settings:  Settings.Views.General.InputFields.RouteServiceHint Settings.Views.General.InputFields.RouteServiceIcon Settings.Views.Signup.RouteServiceScheduledText Settings.Views.Signup.RouteServiceOnDemandText Settings.Views.Signup.HideRouteServiceField
