

## Release Notes for Version 7.0.7652

App	Feature	Type	Comments	Settings/Required Changes
SPOT	Assisted Assembly	Change	<b>As an AssistedAssembly user I want to restrict use of the Reset button</b> The Reset button on Assisted Assembly will now require the "Reset Assisted Assembly Session" activity right.	
SPOT	Conveyor	Addition to Existing Feature	<b>As a conveyor special arm user I want some additional settings</b> Added "Assemble to special arm" setting to Discount Groups and Invoice Modes	
SPOT	Customer View	Change	Added a setting to toggle between displaying either Customer Connect button or Mobile Invitation button on Customer View. Added Customer Connect As Customer to Menu > Tools so it can be accessed from outside Customer View.	Company > CustomerConnect Settings > CustomerConnect Button on Customer View
SPOT	General	Fix	Fixed a problem where controls in Customer View were not visible after printing a CRM item or CRM history.	
SPOT	Holiday Scheduler	Fix	Fixed problem where adding new holiday schedules could change the holiday schedule assignment for the logged-in store.	
SPOT	Markin	Fix	An error occurred if an order was detailed with a preset promised date.	
SPOT	Notification Center	Addition to Existing Feature	<b>As a SPOT user, I would like to view the Mobile App feedback via the notification center</b> Customer feedback items from MDC Mobile or CustomerConnect have been added to the Messages tab of the Notification Center.	
SPOT	Pricing	Change	<b>As a SPOT user, I would like to add a negative manual adjustment that exceeds -999.99</b> Manually entered adjustment or coupon values in Order Detail can now range from 99999999.99 to -9999999.99 instead of 9999.99 to -999.99	
SPOT	Printing	Fix	<b>As a SPOT user, I would like to customize the customer info slip to my needs</b> Customer Info Slip templates can now be edited, similar to invoice templates.	Company > Report/Printing Settings > Document Templates > Customer Info Slip Templates Workstation > Report Settings > Printer Assignments > Customer Info Slip
SPOT	Reports	Fix	Fixed an error when running certain reports for departments that have an apostrophe in their names.	
SPOT	Reports	Fix	Fixed a problem that caused the Incoming Detail (non-tax) report to fail when run on archived data.	
SPOT	Reports	Fix	<b>As a SPOT user, I would like a report that shows Mobile App usage for the new MDC Mobile app</b> Updated Reports Gallery > Management > Mobile Usage to be compatible with the new mobile app.	
SPOT	Routes	Fix	Route orders that had been prepaid with cash credit were showing as PNP after being marked as delivered in RouteTrac.	

CustomerConnect	General	Fix	Fixed API customer signup issue caused by a missing setting.	
Mobile\MDC Mobile Client	General	Fix	Fixed layout of the pickup request screen for smaller iPad devices.	
Mobile\MDC Mobile Client	General	Fix	Support ? for characters and # for digits in postal code masks. Example: ##### or ?? #?#.	
Mobile\MDC Mobile Client	General	New Feature	<b>As SPOT, we would like to speed up the MDC app by not requiring download of customer barcodes</b> Added Customer->GetCustomerNoBarcodes API method (with same parameters as the existing GetCustomer method). This allows for faster retrievals for those scenarios where the customer's 2D barcodes are not necessary.	
Mobile\MDC Mobile Client	General	Change	<b>As SPOT, we would like optimized performance and reduced dependencies for the MDC mobile app</b> Performance improvements to MDC Mobile app. Both iOS and Android apps start faster, along with reduced load/display times for each view.	
RouteTrac	General	Fix	Fixed - RTM - Invoices with large balances (> 999.99) will not post correctly	
RouteTrac	General	Fix	Fixed - RTM - "No Visit" events are still recording a bag scan	
RouteTrac	General	New Feature	Added the ability to park multiple manifests on the device and switch the active manifest	
RouteTrac\RouteTrac Client	General	Fix	Fixed drop-down menu and reading messages.	
RouteTrac\RouteTrac Client	General	Fix	Added "In progress" indicator	
RouteTrac\RouteTrac Client	General	Fix	Added ability to reset vehicle and miles	
SPOT API	General	Fix	The email sent to customers when they changed their account information in CustomerConnect or MDC Mobile was not detecting a change to the customer's home store.	
SPOT API	General	New Feature	<b>As a SPOT user, I would like the API to consume the on-demand pickup request SMS responses</b> API TWIML processor is updated to be able to consume the OTS On-Demand Opt-In messages (SMS).
