

Release Notes for Version 7.0.8240

App	Feature	Type	Comments	Settings/Required Changes
SPOT	Cash Control	Addition to Existing Feature	<i>As a SPOT user I need support for MS Cash Drawers with USB interface</i> Added support for MS cash drawers with a USB interface.	Cash Drawer Type = USB Port = the device number selected with the DIP switches on the drawer (ranging from 1 to 8)
SPOT	Configuration	Fix	<i>As a SPOT user, I would like the "Export File Folder" option description to be updated to the most recent changes to our hosted environment</i> Updated the description of the setting Store > Site settings > Restoration Settings > Export File Folder. It now correctly explains how to specify a path on the local computer when using Hosted SPOT.	
SPOT	Configuration	Fix	Sometimes during saving settings it was possible to quickly click the save button more than once which could cause price tables to not save properly.	
SPOT	Configuration	Fix	Fixed crash in long resync route operation in customer group setup if a group is moved during the operation.	
SPOT	Conveyor	Fix	Locker orders split in the Split Monitor were not retaining their Locker ID	
SPOT	Credit Cards	Fix	Fixed - Pivotal (Canadian) Debit Card "Credit/Return" transactions fail to submit to the gateway.	
SPOT	Email	Change	The customer ID has been added to emails going through Notification Framework to prevent email traffic to certain domains from being flagged as spam	
SPOT	Reports	Fix	<i>As a SPOT user, I would like the 'Daily Production - Presser Totals' report to include the time</i> Corrected the Daily Production - Presser Totals report to display time as well as date.	
SPOT	Reports	Addition to Existing Feature	<i>As a SPOT locker user, I would like an audit report for locker activity</i> Added a Locker Activity report to the Locker category of reports gallery. This provides an auditing report for the new Web Manager based locker features.	
SPOT	SPOTMap	Change	<i>As a SPOT user, I would like to be able to use the latest mapping components and maps</i> SPOT - Updated mapping components to the latest revisions, allows us to update the maps to the latest versions.	
SPOT	Tags	Fix	Fixed a problem in tag templates where the date from @DATE could be garbled.	
SPOT	Timeclock	Fix	Timeclock entries on rare occasions were saving the time out value with a date of 12/30/1899	
SPOT	Utilities	Fix	The Shipping screen could get an error if the printer from the hosted session was not correctly mapped	
Conveyor Client	General	New Feature	<i>As a QuickSort user, I would like SPOT stores to pull print jobs from a custom folder</i> Added a new configuration option for QuickSort compatibility to SBSConveyorClient: PrintTxtPath. Normally SBSConveyorClient will monitor the path specified in ConveyorFolder for Print.Txt files (requests to print an invoice). If PrintTxtPath is specified, SBSConveyorClient will print invoices only when Print.Txt files are placed in PrintTxtPath (any	

			appearing in ConveyorFolder are ignored). This is to be compatible with a QuickSort option of operating against multiple POS systems simultaneously.	
RouteTrac Client	General	Change	<i>As a RouteTrac (PC) user, I would like to have the system updated with the latest mapping components</i> RouteTracPC - Updated mapping components to the latest revisions, allows us to update the maps to the latest versions.
