

Release Notes for Version 7.0.9586

App	Feature	Type	Comments	Settings/Required Changes
SPOT	Configuration	Change	When Store Settings > Mark-in Settings > Department Settings is enlarged the grid will enlarge as well to allow easier editing.	
SPOT	Conveyor	Fix	PrintCache printing will now attempt to use the printer designated as the Assembly Invoice printer as the file printer (on the detail workstation, or on the workstation defined in cachesettings.txt when the print cache server is in use) if it does not find a printer in the printers collection named exactly "File".	
SPOT	Coupons	Fix	Coupons created in a UK environment with an expiration of Jan 1st 2030 or later would not appear in the coupon selection list in Order View	
SPOT	Credit Cards	Fix	Payment Express - Close the loop with SPOT to accept legacy CCOF for submission via gateway/not terminal Fixed issues in SPOT with PaymentExpress processing and tokenizing certain CCOF entries. Other minor adjustments to advanced logging, etc.	
SPOT	Customer View	Fix	Fixed an error when attempting to change the Disable Monthly Surcharge setting in Customer View > Route.	
SPOT	Notification Center	Change	The Locker Pickups tab of Notification Center will now show the temporary tag ID in the "" field if a temporary tag has been assigned to the locker pickup.	
SPOT	Production	Fix	Standard production commitment: Fix invoice search from production commitment grid when "Production Commitment Mode" is "Current Store" to only show results from the current store.	
SPOT	Rack	Fix	Increase the maximum length of the Location field when Racking from 20 characters to 50, which is the maximum size of a rack location in the database.	
SPOT	Reports	Fix	SPOT will now save CRM entries to appropriate customers when sending a SMS report presentation.	
SPOT	Reports	Fix	Fix "Tax Collected by Tax Entity" to account for the case where the item is taxable but item alteration is not.	
SPOT	Reports	Addition to Existing Feature	As a SPOT User I want the customer signup date on the Lost Tuna report Added the customer signup date to the Lost Tuna report.	
SPOT	Routes	Addition to Existing Feature	As a SPOT user, I would like orders detailed for customers with outstanding on-demand pickup requests to be assigned to the on-demand route When entering the detail screen, if a non-route customer has had an on-demand route pickup request in the last three days, the clerk will be prompted whether to assign the new orders to the on-demand route or not.	
SPOT	Routes	Fix	Fixed - Route Manifests are pulling On-Demand requests from the following day	
SPOT	Routes	Addition to Existing Feature	Implement Route Manifest changes - Add option to include orders on manifest only when all are ready, either by Promised Date or Visit SPOT - Added option to include orders on Route Manifests only when all promised are ready.	Store Settings > Route Settings > Show Ready Orders on Manifest When (Each is Ready/All Promised are Ready/All in Visit are Ready)

SPOT	Routes	Addition to Existing Feature	Implement Route Manifest changes - Add ability to generate Pickup & Delivery Only Route Manifests SPOT - Added ability to generate Pickup & Delivery Only Route Manifests	Store Settings > Route Settings > Pickup/Delivery Only Manifest Options (Disabled/Enabled)
SPOT	Search	Fix	Fix Location Search to not show orders that have in the past been in the specified location but are not presently there.	
SPOT	Tags	Change	As a Tailwinds tagging user I want "Assisted Tag by Department Group" to remember patterns as well as tag numbers Changed the Assisted Tag by Department Group setting to remember the tag pattern as well as the tag sequence number	
SPOT	TimeClock	Fix	Fix TimeClock > Manage Entries > Add Entry to record hourly pay rates in the entry.	
OTS	General	Fix	OTS - Route reminders will now exclude on-demand customers who have already scheduled a visit
